Emergency Lighting & Siren Products [190-10]

If you are buying these, you might need:

Butt Connectors ..... page 1729
Automotive Hookup Wire ..... page 1762
Screws, Sheet Metal and TEK ..... page 1751

MX7000 Light Bars

67852

Code 3 MX7000 Dual Deck light bar. You get primary unobstructed signal protection from upper-deck rotators and mirrors, while the lower-deck is dedicated to providing a variety of special purpose lights including sweeping intersection lights. This TESSCO special configured lightbar includes: (4) rotators, diamond mirrors, (2) 50W takedown lights, (2) 50W flashing lights with red and blue filters.... Many custom lighting, power and mounting options are available on a SPECIAL ORDER basis. Ask for FAXBACK sheet (sku 38401) for a list of these options.

TESSCO TECHNOLOGIES®

30-Day Risk-Free Purchasing

Try TESSCO's risk-free purchasing program, designed to give you the opportunity to explore new products without risk.

If for any reason, you are unhappy with a purchase, you may return it within 30 days of receipt. TESSCO will give you a money-back refund or full credit toward another purchase.

TESSCO's 30-day return policy extends to all items except special order or value-added items, which are eligible only if defective.

Qualifying for the risk-free purchasing benefit is easy:

1. Return all items within 30 days after receipt.

2. Return all items in original condition and packaging, freight prepaid.

3. Enclose a return form (found on the back of your packing list) with all items.

After following these three simple steps, TESSCO will award you a refund or full credit toward a future purchase.

Take advantage of TESSCO's 30-day risk-free purchasing today and explore new products with confidence.

A **World-Class** Choice from TESSCO

A Handheld Spectrum Analyzer. Perfect.

Field-Proven Performance. Even Better.

No question, lightweight is a big benefit in the field. But the next important question has to be – will it perform?

The MS2711B delivers on both. Weighing only 4.9 pounds including battery, it's as mobile as you need to be. And when it comes to performance, with a built-in preamplifier there's nothing better for measuring in the 100 kHz to 3.0 GHz range or for testing in a variety of wireless standards including GSM, CDMA and 802.11.

No wonder more field engineers and technicians prefer the MS2711B instead of heavier, traditional and expensive communications analyzers.

The affordable new MS2711B Handheld Spectrum Analyzer. It's ready for your toughest environments. Getting there and back is up to you.

MS2711B Handheld Spectrum Analyzer

Anritsu Specialized Line Sweep Training

Specialized line sweep training is an intense, hands-on training course that focuses on RF line sweep theory and technology. The class is led by Anritsu's factory certified Instructors and can be held at either your location or Tessco's Global Logistics Center in Hunt Valley MD.

- You will learn:
- How to identify, locate, repair and document transmission line faults
- How will cables and connectors effect your sweep results
- The technical aspects of line sweeping
- Check www.tessco.com for class locations and dates. Look under Resources & Publications/ Training.

ek Field Strength Analyzer

Protek Hand Held 2.06GHz RF Field Strength Analyzer. Detects wideband and narrow band FM, AM and Single sideband signals. Up to 160 channels may be scanned and displayed. Audio output and built in speaker. All functions are menu selected, instrument setups and displayed data may be stored in memory. Includes Software and RS-232 cable with serial or parallel interface, for hard copy print of spectrum and bar graph displays.

- ency Range: 100KHz to 2060MHz
- 192 pixel LDC Display
- Display Range
- pm Reference Oscillator Accuracy
- B Level Accuracy
- Hz and 180kHz (-6dB) Resolution Bandwidth
- AM/FM Demodulation
- 2 GHz frequency counter
- Backlit Display
- Memory Storage for 10 Setups and 10 Displays
- Dimensions: 9.5" H x4" W x 1.77" D Weight 1.4lbs.

Spectrum Analyzer Adapter

The LPT-1250 10 MHz to 1.15 GHz bandwidth, digitally synthesized spectrum analyzer adapter/simulator can be used with the display of any oscilloscope for spectral analysis. This model conveniently provides you with a powerful RF test and measurement tool. The simple user interface allows both the novice and seasoned expert to use the LPT-1250 right out of the box. Flicker free operation provides rock steady traces and markers assist measurement analysis.

- ncy Range: 10 MHz to 1 GHz (usable 150 o 1.15 GHz.
- Screen Markers with Signal Level Readout
- evel Range: -100 dBm to +20 dBm
- nce Level Accuracy +/- 1.5 dB at 80 MHz Dis- nge: 75dB (usable)
- ncy Stability: +/- 10 ppm
- ncy Control: Digital Phase Lock
- Resolution Bandwidths: 3 kHz, 30 kHz, 220 kHz, 4 MHz +/- 15%
- Phase Noise: -83 dBc/Hz at 20 kHz offset, typical
- Noise floor: -95 dBm at 30 kHz RBW, -100 dBm typical
- Options: Tracking Generator, High Stability Oscillator, Remote Control and Frequency Extension (2.6 GHz).
- 10.0"W x 3.75"H x 10.75"D. Weight 5 lbs

LPT Remote Spectrum Analyzer Adapter

The LPT-1750 Fully Synthesized RF 10MHz to 1 GHz Remote Spectrum Analyzer gives you the ability to use your PC either directly connected (RS-232) or from remote dial-up. Built in modem, internal memory and real time clock allows fully automatic unattended measurements anytime from any location. The data is saved in internal memory and easy access via telephone to eliminate costly service calls.

- Remote and Mobile Monitoring System
- Frequency Range: 10MHz to 1 GHz

B & K Spectrum Analyzers

The B & K Spectrum Analyzers are great for professionals in telecommunications as well as cable TV industry. All three models are suitable for pre-compliance testing during development and performance optimization. The spectrum analyzer/sniffer probe combination is an excellent solution for RF leakage/radiation investigation, CATV/MATV systems, cellular telephone/pocket pager tests and EMI diagnostics.

- Frequency Range: 150 KHz to 1050 MHz
- Dynamic Range 80db (113db with attenuation)
- AM & FM demodulation included
- Optional built-in tracking generator -50dbm to +1dbm attenuator 0 to 40db (2630 & 2635)
- Amplitude range: -100dbm to +13dbm
- Average noise level: -99dbm (12.5KHz BW)
- CRT Display 6 inch
- Power: 90-260 VAC, 50/60Hz
- Dimensions: 4.9" H x 11.2" W x15" D weight 13.2 lbs.
- Model 2635 (only) Memory recall Frequency and level marker with RS-232

Avcom PSA Series

The broad frequency coverage and high sensitivity of the PSA-65C is the perfect instrument for field testing of RF systems, satellite system alignment, cellular and production use. The small size, light weight and low cost will enable companies to issue spectrum analyzers to their technical staff when more expensive units are not justified. The Digital Frequency Lock (DFL) function prevents analyzer drift and is helpful when monitoring a discrete signal. A unique zero span function allows instant monitoring of transmissions as soon as the "spike" is tuned to the center of the display. The FM Audio Demodulator allows the PSA-65C to monitor transmissions observed on the display. This feature is particularly useful for locating electronic listening devices.

- Frequency Range: 1.0MHz to 1250MHz
- Center frequency, Span, and Start/Stop frequency display
- 70dB Display Range
- 2dB or 10dB Vertical sensitivity
- 115dB (with attenuation) Dynamic Range
- +/- 2dB Level Accuracy
- 75, 150, 300kHz, 1,3MHz Resolution Bandwidth
- FM Demodulator
- Power: 115VAC/Internal 12V Gel Cell battery.
- Dimensions: 11.5"x5.5"x13.5".
- Has DC block feature to 50V
- Available Options: Tracking Generator, Frequency Extender, Preamp, Broadband Noise Generator.
- ADA-1Da option provides data interface to PC for post measurement analysis

AVCOM 2.4GHz Spectrum Analyzer

The PSA-2400A is designed for field measurem the 2.4GHz spectral range. Microwave links, cellul phones, wireless LANS and bluetooth all operate unlicensed 2.4GHz ISM band. the PSA-2400A is a ble, lightweight (8lbs) spectrum analyzer that is id for broadband field work. Adjustable span and tun coupled with on-screen display of center frequenc span gives you the information you need. The high trast LCD display is readable in full sunlight, and b for use at night.

- Applications include: Predeployment WLAN site surveys
- Antenna placement to align antenna's and optimize signal stength
- Perfromance tests: Occupied bandwidth, signal strength and propagation
- Frequency range: 2400 MHz to 2500 MHz
- Reference levels: 0, -20, -40 dBm
- Span: >100MHz: Resolution bandwidth: 1MHz
- Sensitivity/dynamic range: 10 dB/div.
- Sensitivity: -100 dBm: Noise floor: -105dBm
- Display: 5.7" diagonal monocrome 1/4 VGA LCD
- Power: external 85-264VAC, 47-440Hz/9-15VD Internal 6V gel cell battery
- Weight: 8 lbs.

ritsu HandHeld 3 GHz Spectrum Analyzer

Spectrum Master MS2711B from Anritsu is a handheld spectrum analyzer that has all the efits of larger portable instruments at a fraction of the size. The unit utilizes an advanced, ed, handheld, battery-operated, synthesizer-based design that delivers accurate, repeatable surements, making it ideal for field environments and applications requiring mobility. Field neers and technicians will find that the units sensitivity of -115 dBm will be suitable for the ysis and solution of interference, coverage and other RF path related problems. The unit features many "One Button" measurements aimed at simplifying operator use and profes- al analysis and reporting software comes standard with every unit.

- Includes: Software Tools, Battery Pack, Soft e, AC/DC Power Cords, Serial Cable and User's le
- uency Range: 100 kHz to 3.0 GHz
- weight at less than 4.9lbs
- ed, Handheld Battery-Operated Design
- e Level: -115dBm
- mic Range: >65dB
- litude Accuracy +/- 1.5 dB
- 10 Measurement Test Set-Ups
- up to 200 Measurement Traces
- numeric Labeling of Saved Measurements
- ssional Analysi and Reporting Software
- k Span Operation, Plus Zero Span
- Resolution Bandwidths: 10 kHz, 30 kHz, 100 kHz and 1 MHz
- Video Bandwidth: 100 Hz to 300 kHz in 1-3 sequence
- RF Input to +27 dBm
- Manual and automatic attenuator control
- Ability to store and recall antenna factorsl
- Built-in AM/FM demodulation
- Rechargeable, Field Replaceable Battery
- RS-232/USB Interface
- Features: Multilingual User Interface, 6 markers, Single/Segmented limit lines and Trace Overlays for on screen comparisons
- Dimensions: 8.0" H x 7" W x 2.25" D
- Available with optional tracking generator (Option 20)

R&S 3 GHz Handheld Spectrum Analyzer

The Rohde & Schwarz FSH3 is the ideal spectrum analyzer for rapid, high-precision, cost effective signal investigations. It provides a large number of measurement functions and so can handle from the installation to maintenance of a mobile radio base station, through on-site fault location in RF cables to development and service an extensive range of applications. Offers measurement functions for Spectrum Analysis, Scalar Network Analysis (Tracking Generator required), Channel Power Distance t-to-Fault measurements (optional) and Power (sensor required).

- Robust edge protection, Ease-of-Operation
- Portable NiMH Battey power up to 4 hours continuious operation
- Frequency Range: 100 KHz to 3 GHz
- Resolution Bandwidths: 1 KHz to 1 MHz
- Video Bandwidth: 10 Hz to 1 MHz
- Average Noise Level: -116 dBm
- Displayed Units: dBm, dBmicro Volts, dBmV, mircoV, mV, V, nW, mW and Watts
- Markers for AutoPeak, next peak, noise marker and frequency counter, Stores up to 100 traces and set-ups with easy data transfer to PC
- External, Video and free-runnning triggers
- Audio Demodulation for AM and FM
- Includes: Ac power adapter and NiMH battery pack, RS-232-C cable, Headphones, CD-ROM with control software and Manual
- Power: AC 100 to 240VAC 50/60 Hz or NiMH battery pack (4-Hours of operation)
- Dimensions: 6.7" x 4.7" x 10.6" Weight: 5.7 lbs.
- Options: Distanace-to-Fault measurments (calibration terminations and 1 M cable) option B1. Requires VSWR Bridge
- VSWR Bridge & Power Divider required for Distance to Fault measurements
- Optional Power sensors: Model Z1 covers 10MHz to 18 Ghz 100nW to 500mWatts with male connector

Acterna BaseStation/Air Interface Module

The Base Station and Air Interface Test Module (BAT), measures RF parameters from a base station via direct connect or air interface. Providing basic RF power, spectrum, and frequency offset, without having to disrupt the base stations operation and revenue-generating traffic. With the BAT the field technicians can easily check the performance of a cell site. This easy-to-use hand-held tester allows Go/No/Go testing by non-RF field technicians as well as detailed analysis for the RF experts. With the use of interchangeable field modules the users can verify wired interfaces from copper T1/T3 up to 10 GBit optical networks as well as wireless interfaces.

- Multiple wireless system testing: AMPS, CDMA, TDMA, GSM, PCS, and iDEN
- Interface Analysis tool detects interfering signals in the RF environment
- Database of base stations full details of site locations, configurations and performance settings
- Measures output power, ripple, frequency, spectrum and reflection
- Verify the antenna match in the frequency domain while the cell site is in operation
- Generates detailed cell site reports for RF performance engineers
- RF Speecifications: RBW 200KHz, 30KHz, Sample rate 50,000/sec
- Dynamic Range: Instantaneous 80dB, Total >110dB
- Measurement power: 30dBm (1W), DC blocking 50V
- Module Connections: Main and Reflection N-female, Trigger BNC female, Antenna TNC female
- Optional Application Modules Include: 2207 T1/T3 DS1/DS3, 2109 Copper Analyzer, 2357 DSL Broadband, 2310 SONET, 2416 SDH, and 2510 10-Gig Services Modules
- Software upgrades see TestPad 2000 Software Options via PCMCIA cards
- Optional Accessories: CLA, Bi-directional Coupler, PC Software, Large Soft Carrying Case
- BAT Modules Includes: two 6ft. Coax Type N-N male, two N-SMA male adapters, Antenna, and Getting Started Guide.
- Dimensions BAT and TestPad overall: 7.5" x 11.5" x 2.25" Weight 5 lbs.

Advantest 3 GHz Spectrum Analyzer

Features ultra-compact and lightweight design. The 6" TFT color LCD display tilts to optim visibility. Features wide array of analysis functions. Syntehsized local oscillator for high stabi measurements, Switchable preamp for high-sensitivity measurements. Built in adjacent cha power, occupied bandwidth, and channel power measurements See table below for availab options.

- Frequency Range: 9 KHz to 3 GHZ
- Reference Accuracy: +/- 2x10E-6/year
- Resolution BW: 1 KHz to 3 MHz (1-3 sequence),(100 Hz, 300 Hz W/Opt.26)
- Display Dynamic Range: 100 dB
- Input Range: Noise floor to +20 dBm
- Amplitude accuracy: less than +/- 2 dB
- Sweep Time: 50ms to 1000s
- Two PCMCIA memory card slots
- 3 way power supply, AC line, external DC and optional battery pack
- Dimensions: 11.37" W x 5.75" H x 13.25" D Wei 15 lbs.

IFR 2.7 GHz Spectrum Analyzer

The IFR 2398 offers exceptional performance in a lightweight portable spectrum analyzer. It features a fully synthesized local oscillator for accurate frequency measurments, split screen operation and optional DC power supply or external battery for remote location use.

- Frequency Range: 9Khz to 2.7Ghz
- Input Range: -105dBm to +20dBm
- Resolution Bandwidth: 300Hz to 3mHZ
- Autoset: A one button solution for instant viewing of an unknown signal
- Stores 20 traces & 10 setups in the internal memory
- RS-232 Interface & a parallel printer port
- Amplitude Accuracy: +/-1.5dB
- Display: 7.4" Monochrome
- Dynamic Range: 125dB
- Weight: 18.0 lbs.
- Dimensions: 13.75"W x 7.15" H x 14.75" D
- Unit Includes: Soft Carry Bag, Operation & Programming Manual, AC cord and RS-232 Cable

Agilent ESA-L

The Agilent ESA-L portable Spectrum Analyzers provide excellent speed and accuracy with easy, reliable operation. Features high resolution display, disk drive, parallel printer port, and water-resistant front panel. Highly accurate and repeatable measurements with the continuously phase-locked synthesizer. Continuous background auto-alignment provides full accuracy over time and varying temperatures. Quick warm-up (5 minutes) provides fully calibrated field measurements without waiting. Optional tracking generator supports antenna and transmission line scalar analysis. 3 year global warranty protects your investment.

- Frequency Ranges: 9KHz to 1.5GHz, 9KHz to 3.0GHz, and 9KHz to 26.5GHz
- Features Include: Field Rugged Portability
- High Resolution Mono-chrome Display
- 3.5 inch Floppy Drive
- Phase Noise: less then 90dBc/Hz at 10 kHz offset
- Frequency Accuracy: +/- 2 kHz
- Overall Amplitude Accuracy: +/-1.1 dB
- Resolution Bandwidth Range: 1kHz to 5 MHz
- Transfer measurement results with included Benchlink XL PC software
- Measurement range -119 dBm to +30 dBm
- Dynamic Range: +40dBm SHI,+7.5 dBm TOI
- Sweep Time : 4 ms to 4000 seconds
- One button measurements; adjacent channel power,occupied bandwidth,channel power, harmonics, and 10 peak table
- Dimensions: 8.8"H x 16.3" D x 14.9" W
- Transfer measurement results with included Benchlink XL PC software

Agilent ESA-E Spectrum Anlayzers

The Agilent ESA-E series of general-purpose, portable spectrum analyzers offer engineers i R&D, manufacturing and field service faster measurement speed than comparably priced p ucts. Engineers will also find that the superior dynamic range, accuracy and resolving powe surpass other similarly priced analyzers. Features high resolution color display, disk drive, p allel printer port, GPIB, and water-resistant front panel.

- Frequency Ranges Include: 9KHz to 1.5GHz, 3.0GHz, 6.7GHz, 13.2GHz, and 26.5GHz
- Features Include: One-millisecond RF sweep time, 45 measurements/second
- High Resolution Full-Color Display
- Resolution Bandwidth Range: 1kHz to 5 MHz
- 99 dB third-order dynamic range and -152 dBm sensitivity (+12.5dBm TOI)
- Fault location, phase noise, PCS Service measurement personalities available
- Flexible platform for optional performance that can be configured for unique application demands
- Segmented sweep pastes together up to 32 disc tinuous spans in one sweep
- Overall amplitude accuracy ±1 dB
- Residual Responses: <-90 dBm
- Featured Options Include: Bandwidth filters (10 300 Hz), Tracking Generator 1.5/3 GHz, Preamp fier 1.5/3 GHz, High-Stability Time Base, FM Demodulation, CDMA Personalities
- Fault location, phase noise, PCS Service measure ment personalities available
- Dimensions: 8.8" H x 16.3" D x 14.9" W
- Includes: RS-232 Interface, 3.5inch Floppy Drive, with 6-slot for field upgrades

ntest 3GHz Spectrum Analyzer

NTEST R3131A Spectrum Analyzers cover from 9kHz to 3GHz., a low noise floor of -Bm (at 30 Hz resolution bandwidth), and an array of standard features including GPIB ace, printer interface, and automated tests such as occupied bandwidth and adjacent el power. Options include tracking generator and rack mount kit

- ncy Range: 9 kHz to 3.0 GHz
- nce Frequency Accuracy: 2 x 10E-6/year
- ncy Span: zero span, 1 kHz to 3 GHz
- ncy Stability Residual FM: <=60 Hz p-p in 100
- tion Bandwidth Range: 1 kHz to 3 MHz (1-3-)
- Time: 20 ms to 1000 s
- ity: -132 dBm
- Reference Level Accuracy: 1.5 dBm
- Display Range: 8 div; 10 dB/div, 10 div; 1, 2, 5, dB/div
- Internal Attenuator: 30 dB
- Light weight (25lbs.), space -saving design
- Improved ease of use with auto-tune function
- Total level accuracy guaranteed by auto-cal function

Advantest 3G/8GHz Spectrum Analyzer

ADVANTEST R31XX series Portable Spectrum Analyzers from 9kHz to 8GHz, depending on model, provide easy viewing 6.5" TFT color display, a low noise floor of -132 dBm (at 30 Hz resolution bandwidth), and an array of standard features including GPIB interface, printer interface, and automated tests such as occupied bandwidth and adjacent channel power. Options include tracking generator, high stability time base, high speed time-domain sweep, and narrow resolution EMI bandwidth.

- Frequency Range:
- R3132: 9kHz to 3GHz / R3162: 9kHz to 8GHz
- Total level Accuracy +/- 1.5dB
- High speed measurements, 20 traces per second
- 6.5 inch TFT color LCD display
- 3.5 inch Floppy disk for data storage
- Preamplifier with Built in frequency counter
- Multiple Markers (<10)
- VGA output
- Split Screen Display
- Dimensions: 16.7" H x 7.0" H x 11.8" D

Bird SA2500A Site Analyzer

Bird's Cellular/PCS Site Analyzer is a multi function site management tool designed to help do much more then simply repair broken cables or faulty antennas after the fact. The Site Analyzer combines ease-of-use with powerful measurement and data analysis to help perform predictive maintenance. PC software allows download to PC to analyze data for long-term assessment of system trends, problems, and performance. No options are needed for power measurement, just purchase an In-Line (5010) or Terminating (5011) power sensor.

- Includes: PC Tools Software, Battery, Soft Case, AC/DC Power Cords and the Instruction Manual
- Features: Color Display with backlight, Unlimited Trace Overlays, Cable List, 6 Markers, Limit Test
- Frequency Range: 780 MHz to 2500 MHz
- Sweep Tests and Fault Location displayed in either VSWR or Return Loss
- Saves 300 Measurement Traces with Alphanumeric Labeling
- Saves 15 Calibrated Setups
- Professional reporting and analysis software
- Data Transfer via 9-pin RS-232 connection
- Superior Immunity to on-frequency interference, +13dBm
- Field Replaceable lithium ion battery
- Digital Power Meter, requires the purchase of either the 5010 or 5011 power sensor

Bird Electronic Corporation

Bird provides simple solutions for antenna and cable testing. These products also have power measurement options.

BIRD SA-4000 Site Analyzer

Bird's SA4000 Site Analyzer is the newest offering from it is designed to help do much more then simply repair ken cables or faulty antennas after the fact. The Site Ana combines ease-of-use with powerful measurement and analysis to help perform predictive maintenance. PC soft allows download to PC to analyze data for long-term as ment of system trends, problems, and performance. No options are needed for power measurement, just purcha In-Line (5010) or Terminating (5011) power sensor.

- Includes: PC Tools Software, Battery, Soft Case, AC/DC Power Cords and the Instruction Manual
- Features: Color Display with backlight, Unlimited Trace Overlays, Cable List, 6 Markers, Limit Test
- Frequency Range: 25 MHz to 4 GHz
- Sweep Tests and Fault Location displayed in either VSWR or Return Loss
- Saves 300 Measurement Traces with Alphanumeric Labeling
- Saves 15 Calibrated Setups
- Superior Immunity to interference, +13dBm

Anritsu Single Port RF Site Master

The Site Master is designed to accurately locate and identify cable and antenna system faults. Measurement capabilities include return loss, VSWR, cable loss and distance-to-fault (DTF) analysis. Professional data analysis software is provided to enable the user to track system trends, problems and performance in addition to report generation.

463103

- Includes: Software tools, Battery, Soft Case, AC/DC Power Cords, Serial Cable and User's Guide
- Multilingual user interface, Enhanced Cable List, 6 Markers, Single/Segmented Limit Lines and Trace Overlays
- Frequency Range: 25 Mhz to 4 GHz
- Less than 4.9 lbs
- Industry leading immunity to on Channel RF interference
- Easy to use with On-Screen set-ups
- Saves up to 200 Measurement Traces
- Saves 10 Calibrated Set-Ups
- Alphanumeric Labeling of Saved Data
- Automatic Time and Date Stamp
- Distance measurement in feet or meters
- Options: RS-232/USB interface, Power Monitor (Opt.5)
- Power Monitor Option requires an RF Detector

Anritsu Dual-Port RF Site Master

The Site Master S251C site management tool is designed to accurately locate and identify cable and antenna system faults. Measurement capability includes return loss, VSWR, cable loss and distance-to-fault (DTF) analysis. In addition, the S251C features a second port for antenna isolation and gain measurements. A selectable +6 dBm or -30 dBm output and optional Bias Tee enables users to conveniently verify Tower Mounted Amplifier (TMA) gain before and after installation. The S251C's patented RF interference rejection feature and high dynamic range (> 90 dB) enables the S251C to accurately measure antenna-to-antenna isolation in the presence of high RF activity. Data Analysis Software enables assessment of system trends, problems and performance in addition to professional report generation.

- Includes: Software Tools, Battery Pack, Soft Case, AC/DC Power Cables, Serial Cable and User's Guide
- Features: Multilingual User Interface, Enhanced Cable List, 6 markers, Single/Segmented Limit Lines and Trace Overlays
- Frequency Range: 625 MHz to 2500 MHz
- Lightweight at less than 4.9lbs
- Industry Leading Immunity to on channel RF interference
- Intuitive and easy to use with On-Screen Set-Ups
- Long Range High Resolution Fault Location
- High Dynamic Range
- Accurately Tests Tower Mounted Amplifiers
- Performs Isolation Tests
- RF Source: 625 MHz to 2500 MHz, 10 kHz Steps
- Saves 10 Calibrated Test Set-Ups
- Saves 200 Measurement Traces
- Alphnumeric Labeling of Saved Data
- Automatic Time and Date Stamp of Saved Data
- Distance Measurement in Feet or Meters
- RS-232/USB Interface
- Full Range of Market and Limit Functions
- Options: Power Monitor (Opt.5) and Built in Bias "T" (Opt.10A), 240ma
- Power Monitor Option requires an RF detector

Anritsu Site Master w/ Spectrum Analyzer

The Site Master models S114C and S332C site management tools are uniquely designed to accurately locate and identify cable and antenna system faults as well as perform spectrum analysis. Cable and antenna measurement capability includes return loss, VSWR, cable loss and distance-to-fault (DTF) analysis. Patented RF interference rejection enables accurate measurements in the presence of high RF activity. Spectrum analysis capability (100 kHz to 1.6 GHz in the S114C and 100 kHz to 3.0 GHz in the S332C) allows field engineers and technicians to solve RF problems such as coverage, interference and other path related problems. Data Analysis software enables assesment of system trends, problems and performance in addition to professional report generation. One Button Measurements: Channel Power, Occupied Bandwidth, Adjacent Channel Power and Field Strength.

- Includes: Software Tools, Battery Pack, Soft Case, AC/DC Power Cords, Serial Cable and User's Guide
- Features: Multilingual User Interface, Enhanced Cable List , 6 markers, Single/Segmented limit lines and Trace Overlays for on screen comparisons
- Frequency Range: See Table
- Industry Leading Immunity to RF interference(Sweep Applications)
- Intuitive and Easy to use with On-Screen Set-Ups
- Saves 10 Calibrated Test Set-Ups
- Saves up to 200 Measurement Traces
- Alphanumeric labeling of Saved Measurements
- Automatic Time and Date Stamp of Saved Data
- Distance Measurement in Feet and Meters
- Resolution Bandwidths: 10 kHz, 30 kHz, 100 kHz and 1 MHz
- Video Bandwidths: 3 kHz, 30 kHz, 100 kHz and 300 kHz
- Noise Floor < -97 dBm(>300 KHz)
- Dynamic Range > 65 dB On Sweep Analysis
- RS-232/USB Interface
- AM/FM DEMOD is not available on the S332C
- Options: Power Monitor (Opt.5)*(Requires RF Detector)

Anritsu
Discover What's Possible

Anritsu, one of the world's largest providers of technology solutions, including the new S820C Microwave Site Master Cable and Antenna Analyzers.

Anritsu Microwave Site Master

417351

The Site Master 800-series site management tool is designed to accurately locate and identify cable, waveguide and antenna syst faults. Measurement capability includes return loss, VSWR, cable and distance-to-fault (DTF) analysis. Patented RF interference re tion enables accurate measurements in the presence of high RF activity. Data analysis software enables assessment of system tre problems, performance in addition to professional report gener tion.

- Includes: Software tools, Battery Pack, Soft Case, AC/DC power cords, Serial Cable and Users Guide
- Frequency Range (see table)
- Handheld, Battery- Operated Design
- Lightweight at less than 4.9 lbs (including battery)
- Industry Leading Immunity to RF interference
- Intuitive and easy to use with on screen set ups
- Fast Sweep Tuning Mode for Waveguide Component/Alignment Testing
- Saves 10 Calibrated Test Set-Ups
- Saves up to 200 Measurement Traces
- Distance Measurement in Feet and Meters
- RS-232/USB Interface
- Options: Power Monitor (Opt.5)*(Requires RF Detector)
- Ask about Waveguide Calibration Components a Adapters

Anritsu Phase Stable Cables

Phase Stable Cables: These cables allow you to extend the test port of the Anritsu Site Master without adversely affecting the accuracy. Normal jumper cables can distort readings and cause errors when they are moved or the temperature changes. Connect the phase-stable cable to the Site Master, then perform the usual calibration procedure at the end of the cable. Three lengths available. Armored cable for durability.

SUCOFLEX 18GHz Mircowave Cables

SUCOFLEX low loss flexible microwave cable assem blies, high performance, reliability and stability. Silver- plated copper wire low density PTFE dielectric and f jacket, available in military approved versions. Ideal fo Test & Measurement applications, as Antenna cables, especially in harsh environments, and for use in labo tories, aircraft and nautical.

- Flexible Microwave Cables 18GHz
- Low insertions loss and VSWR
- High Isolation & Water Resistant

Agilent 1.3GHz Network Analyzer

The Agilent 8712ET RF vector network analyzer provides speed, accuracy, and automation features in a compact, integrated instrument for RF component manufacturing, inspection, and maintenance. Features a built in transmission/reflection test set with full range of magnitude and phase measurements. Two independant channels measure and display in a variety of formats including complex impedance, SWR, and delay, on rectangular, polar, or Smith-chart displays. The analyzer also employs advanced vector-error-correction techniques to enhance measurement accuracy.

- Features:
- Frequency Range: 300 kHz - 1.3 GHz
- Source Accuracy: Less than 5ppm
- Source Resolution: 1 Hz
- Test Port Connectors: 50 Ohm or optional 75 Ohm Type-N Female
- 115 dB Dynamic Range
- Narrowband and Broadband Detection
- Minimum Narrowband Frequency: 300 Khz
- Minimum Broadband Frequency: 10 Mhz
- Real Time Sweep Speeds (40 ms/sweep)
- Standard LAN Interface

A Graphical TDR/Cable Fault Finder

The CableMate is a Time Domain Reflectometer (TDR) that allows the user to detect and locate faults in real time in cables ranging from 16 to 2000 feet. It can resolve two faults less than 10 feet apart, eliminating guesswork. It also supports 70 standard cable types in ROM for quick settting selection. 15 plot memory. Built-in balun with BNC/F and standard binding post connections. RF filter gives the CableMate excellent immunity from RF interference. Use the RS-232 port and optional Cable Director windows software to download and store plots. Run on 6 AA batteries. Hand-held for easy use.

Riser Bond 1550

The model 1550 is a low cost waveform TDR with a maximum range of 9,800 ft. Its waterproof housing, large backlit display and one-handed design design make it ideal for outside plant applications.

- Unit Includes:
- Operator's Manual
- Weatherproof Shoulder Bag
- Six AA Batteries

456035 1 EACH	Riser Bond Instruments 000-1550-20 1 year	A low cost waveform TDR designed for CATV troubleshooting with 75 ohm test cables.	1,095.00 2 0.91	1,089.53 1,089.53 1,089.53

Biddle Hand-Held TDR

The Biddle hand-held TDR is designed to test virtually all types of cable including twisted pair, coaxial, parallel conductors and concentric neutral and provides the user with the ability to perform fault diagnosis. The CFL510E is specifically designed for both the communication and power industry. Telephony transmission realted problems include bridge taps and splices, presence of water, open tip, ring, or sheath, load coals and capacitive networks. Designed to be carried on the lineman's belt as the first line of defence when diagnosing and locating faults. Ideal for CATV and cellular for testing the physical intergrity of cables within a network.

- Six ranges for testing cellular, CATV, telephone and power cables
- 25, 50, 75, and 100 ohm output impedance
- TDR Range from 0.3 FT to 9,000 FT
- Accuracy +/- =1.0% of range
- Large backlit LCD graphical display
- Four gain setting per range to amplify trace
- Balance control nulls initial trasmitted pulse allowing detection of close faults
- Dimensions: 9.0" H x 4.5" W x 1.8" D Weight 1.32 lbs.
- Power: 6 AA batteries 25 Hours of use
- Connectors: Two 4 mm-safety terminals with 6.5 FT leads

Tempo TelScout Cable Tester

The TS90 is designed for ease-of-use simply select the cable type and measure, impedance, Vp, Gain, Pulse Width and Vertical position are automatically adjusted as you scan the cable. Just move the cursor to the fault to pinpoint its location. Employs optimized pulsing and sampling coupled with advanced filtering and signal processing techniques to insure maximum measurement range. Designed for twisted pair telephony maintenance and repair to locate intermittent faults and distance to load coils.

- Dual (two) Pair Test Capability
- Large Back-lit Display Easy one-step setup
- Fault Location upto 10,000 ft.
- Rugged Weather Proof construction
- Accuracy: +/- 3ft. at 10,000 ft.
- Power: 6 AA batteries
- Dimensions: 5.6" x 8.3" x 1.8" Weight: 2.2 lbs.
- Includes: Test leads, Carry Case, Batteries and Manual
- Options: Re-chargeable NiCad Battery Pack and Charger

Riser Bond 3300

The model 3300 is a TDR that will test twisted pair cable. It Can be used for troubleshooting, testing, and preventative maintenance. This unit has dual input connectors and has the ability to compare two live pairs or the simultaneous display of stored and live waveforms.

- Unit Includes:
- Operator's Manual
- 120 VAC Charger
- Nylon Carry Case
- Telco Test leads
- Dual Input Connectors
- Rechargeable NiMH battery provides up to 10 hours of continuous service
- Input protection: 400v
- Range: 63,700 ft

Biddle Cable Fault and Verification TDR

The CFL800E provides a simple, practical approach can address a wide range of applications including verification, exsisting cables can be pre-qualified fo ital service such as ISDN, HDSL, or ADSL. Signal a uation and cancellation are due to reflections, cros and random electrical noise from the environmen affecting xDSL implementation. Common mode impairments are found on all loops. Detect and re load coils to introduce digital services to a loop. In mode low resistance cable faults and open circuits be located using pulse matching, pulse reflection ar cation, and Tx Null technology ensures locating th closest and most elusive faults. Brige mode locates resistance faults and loop resistance measurement used to qualify digial services. Housed in a tough A housing and offers IP54 protection.

- TDR measurements ranges from 30ft to 9,000 ft (3000m) full scale
- Automatic resistance bridge measurement range up to 300,000 ft
- Used on Power, Telecom, Coaxial, and Datacom Cables
- Applications: LAN and Premise wiring, CATV, Aircraft wiring
- Voltage measurements +/-250Vdc +/-1.0% Accuracy
- Bridge Resistance 0 to 2000 ohms
- Insulation Resistance Range 200 Mohms
- Backlight Display Power: 6 x AA alkali
- Dimensions: 9.05"H x 4.5"W x 1.88"D
- Connectors 4x 4mm Safety terminals

	3 year	sets, Carry pouch and manual	5.45	2,10

Biddle Dual Port TDR

The CFL535E is an advanced instrument capable o identifying a wide range of cable faults using TDR t nology. Provides fast and accurate results when un ering transmission related problems such as taps o branches, load coils and transformers, capacitor ne works, splices, water saturation, and crosstalk. Dua input and output ports provide Comparisons of go pair to a faulty pair and display the difference, locat crosstalk by transmitting on one pair and receiving another. Store and reproduce traces using the 15 i nal memories. Balanced input and output ports pro significant reduction in common mode distortion, occurence common with twisted pair cable.

- Dual Input and Output ports
- RS-232 interface to a PC or Printer with 15 internal memory positions
- TDR Ranges from 150 ft to 48,000 ft.
- Resolution 4in. @ 600ft. 8in. @ 1200 ft and 0.1% of ranged over 12000 ft.
- Display: 256 x 128 pixel, high definition, backlit graphics LCD
- Trace averaging allows for improved fault locatin noisy cables
- Dimensions: 9.8" H x 7.9" W x 4.3" D Weight 3.2 lbs.
- Power: six (AA) batteries with low battery indic
- Connectors Two pair of 4 mm safety terminals

iser Bond Coax & Twisted Pair TDR

The model 1270 is a combination TDR that will test both twisted pair, and coaxial cable. There are no complicated menus. Every key has a function and every function has a key. Can be used for troubleshooting, testing, and preventative maintenance. Includes automatic fault severity calculation. Features an RS-232 port with WAVE-VIEW software for Windows standard. Uses exclusive SUPER-STORE waveform data storage.

ektronix 1502C TDR

Long range, high resolution fault locator. Designed to quickly and easily locate opens, shorts, crimps, water damage, frays and faulty taps. Rugged & portable, designed for field use. Menu-Driven operation for easy set-up. Help screens aid in instrument operation. Waveform storage for 1 waveform. Information screens provide cable impedance and Vp values. Distance measurements in feet & meters. Digital filtering reduces displayed noise. Vertical & horizontal delta modes allow easy delta measurements. Includes: accessory pouch, front cover, slide rule, spare fuse, 50 ohm BNC terminator, precision 93 ohm cable, BNC Female to female apter, AC power cord, battery, manual, and traceable calibration cert.

Helper Matchbox Antenna/SWR Testers

17372

The matchbox series of SWR testers provide accurate measurements of Match Efficiency and SWR on an analog scale. Test your antennas on both the transmit and receive frequencies using the internal RF source. Powered by alkaline batteries. Includes connector types N, Mini UHF, BNC and TNC.

AEA Graphical Antenna Analyzers

Tuning antennas for the lowest VSWR can be a difficult and lengthy process. AEA's handheld Antenna Analyst will simplify this process. Simply enter the desired frequency range on the keypad & connect it to the antenna. The graphic plot of the VSWR vs. Frequency will be displayed, adjustments can be made, and results can be viewed on-the-spot. 15 plot memories. Battery operated 6 AA batteries.

- Frequency Ranges: 100kHz to 1 GHz

Bird Antenna Tester

57290

A self-contained RF source to precisely set the test frequency. No external transmitter is needed. Two modes of operation: swept, for sweeping the antenna between two frequencies, and single, for determining antenna performance at one particular frequency. IT has an LCD screen and programmable pass/fail limits, audible alert, on screen plot of VSWR swept measurements, RS232 interface. Portable, Rugged, non-skid case . 110Vac.

RD VSWR MONITOR/ALARM

65034

Bird's 7005A-series provides a reliable,continuous check of wireless site performance and abnormal VSWR which can indicate antenna and cable performance problems. Control Channel transmit failure may also be indicated by the units low power alarm feature, that can be toggled on or off. Remote capability enables multiple sites to be monitored from a single location. True average power reading with intelligent VSWR trend analysis eliminates false alarms. The software package permits an MS-Windows compatible PC to display a variety of measured and calculated values. The software also allows you to set the VSWR Alarm threshold, toggle on/off low power alarm and clear alarms.

- er Measurement Range: 25W to 500W
- Input Power: 750 W average, 3.0:1 VSWR
- VR: 1.07:1 max
- ale DB-9, compatible with IBM PC-type serial t
- ware Package displays calculated values : vard power in watts and dBm ected power in watts
- Reflection coefficient
- Transmitted power efficiency in percent
- Return loss in dB
- VSWR
- VSWR Alarm
- Low Power Alarm

Technologies RF Power Meter

The LP Technologies LPT2010A gives you a high quality, low-cost RF power meter. Simple to use, just select the power range, press the Zero button, attach the RF signal source and read the power level. The 2 GHz bandwidth means you don't have to change heads to go from IF to carrier frequencies. It's small, lightweight, and powered by an internal battery. Model LPT-2010P provides pulse power measurements with a 10 micro second response for digital power applications.

- uency Range: Model 2010A 10 MHz to 2 GHz: del 2010P 10MHz to 2.45GHz (usable 100 KHz 7 GHz)
- er Range: 1.999mW, 19.99mW, 199.9mW, 9mW
- uracy: +/- 10% of Full Scale
- r Zero/ Meter Hold buttons
- 3 1/2 digit LCD display
- Recessed Type N female connection
- Maximum input/protection, 500 mW continuous/ 1 W/ 10 seconds
- Internal Battery
- High-impact, rugged design case (3.5"W x 6.3"H x 1.8"D) Weight less than 1 Lb.

Agilent N/Male Power Sensors

12949

50093

Agilent thermocouple power sensors are designed for use with the E4418B and E4419B power meters and provide extraordinary accuracy and stability. Agilent power sensors give you extremely low SWR, and are traceable to the U.S. NIST. The E4418B/19B power meters provide an accurate 1mw reference for sensor calibration. This calibration eliminates the uncertainties due to temperature changes and the variance making measurements with different meter/sensor combinations.

Agilent Wide Range Sensors

471187

58311

The Agilent E-series diode power sensors are designed for use with the E4416/17/18/19B power meters. The E-series CW power sensors (E4412A and E4413A) measure CW signa from 10MHz to 26.5 GHz (-70 to +20dBm). The E-series E9300 power sensors measure th average power of any signal type from 9 kHz to 18 Ghz (-60 to +44dBm), sensor depende The power sensor provides extremely low SWR to minimize the source and sensor mism error. For comprehensive error correction, calibration factors, linearity, and temperature error correction data are stored in EEPROM. Power measurements are traceable to NIST.

ilent Microwave Power/Counter Meter

e Agilent 53140 series Microwave Counter/Power/DVM meters have all the fundamental asurement requirements to install and maintain today's digital microwave radio links. Rugged d portability and a battery option complete the ensemble. For those demanding R&D appli- ions, the 53140 series offers the laboratory-level perfrormance and accuracy required.

- le, Ultra-wideband CW microwave counter ut 50MHz to 20GHz
- er Range -70 dBm to +44 dBm sensor depen- t, Units Absolute: dBm or Watts Relitive: db or ower Frequency Range: 100KHz to 50GHz B and RS-232 interface standard
- nections: BNC and SMA/APC-3.5 female ional Models for: 26.5GHz and 46GHz
- Options: Oven Timebase (001) and Battery/DC input (002), Rack Mount Kit (1CM) and Soft Carrying Case
- Includes: 1.5m power sensor cable, DVM test leads, operating/programming and service manual, and AC power cord
- Power: 90-132 Vac 47.5-66Hz: Optional Battery Power (002) 11-18Vdc 2A lead acid battery 2 hour life.
- Dimensions: 12.9" x 6.1" x 14.8" Weight 10.25 lbs.
- Power Sensor Required: 8480 series, Measures Average and Peak power sensor dependent compatable with the 8480 series sensors only select from Agilent power sensor tables

Anritsu Power Meters

476172

The ML2400A/2430A series of power meters from Anritsu. The ML2430A series is perfect for wide dynamic range power readings on a variety of radio systems. A range of sensors is available for different applications. The MA2481B universal sensor for CDMA 2000, DAB and Wireless LAN. The MA2473A for CW and GSM applications and the fast thermal sensor MA2423B for true RMS measurements on microwave systems such as radio links. The ML2400A series and MA 2468 B sensor have been specifically designed to making exacting measurements required on IS-95 CDMA signals. Built-in software enables remote site monitoring by telephone.

- Frequency Range: 100kHz to 50 GHz
- Power Range: -70 dBm to +47dBm, sensor dependent
- 600 readings per second over GPIB
- Built in Voltage Measurement
- Printer Output Port
- Modem control software for remote monitoring
- Backlit LCD with adjustable contrast
- 1.5 m sensor cable included (2 for dual input)
- 10 Storage Registers
- GPIB and RS-232 Interfaces

Rohde & Schwarz Power Sensors

Power Sensors for NRVS and NRVD power meters. The calibration data memory integrated in the sensor contains all the relevant information. Simply plug and play.

- NRV-Z2,Z5 Medium-Sensitivity Sensors: Diode detectors with 20dB attenuator, True RMS power measurements from 10nW to 500mW.
- NRV-Z1,Z3,Z4,Z6 High-Sensitivity Sensors: True RMS power 100pW to 10microWatts for signals with harmonics, up to 20mW for sinewave signals.
- NRV-51 to -Z55 Thermocouple Sensor: Average power irrespective of waveform for spread spectrum IS-95 CDMA and W-CDMA.
- NRV-Z31 to Z33 Peak Power Sensor: Peak envelope power PEP of modulated or pulsed signals for transmission power of mobile stations in GSM networks.
- Applications: Laboratory and Production tests, R&D, and Base & Mobile Station Test.

Bird 43 Wattmeters

Bird THRULINE instruments can be left in the line for continuous monitoring of either transmitter or reflected power. The frequency range (0.45 - 2700 MHz) and power range (100 mW - 10 KW) are determined by low-cost plug-in elements sold separately. Includes a 30 microampere meter with scales of 25, 50, and 100 unit calibration to permit full scale direct power reading. Peak reading models read true peak power output at ±8% of full-scale accuracy.

- Order Frequency and power specific elements separately

Bird Variable RF Tap Wattmeter

The Bird THRULINE wattmeter features all the versatility as the model 43. It is enhanced by a built in variable RF signal sampler giving the advantage of sampling for use with scopes, frequency counters, spectrum analyzers, etc at the same time the power measurement is made. Amplitude of the RF sample is readily adjustable by a depth of insertion control knob on the unit. Order elements (same as model 43) separately. Power: 2-30MHz 5KW, 30-1000MHz 1KW depending on element. Sampler is variable from -15 to -70 dB.

Bird 5000 Digital Power Meter

62845 62865 482136

Bird's Model 5000 THRULINE Digital RF Power Meter combines a digital display with the ability to accurately measure power in analog and digital RF systems. The Model 5000 operates over a broad frequency range and has the ability to measure True Average Power. The Model 5000 handles Cellular, PCS, ISM, UMTS, 3G Wireless, WLL, Paging, Conventional/trunked radio, Aviation, Military, and Analog or Digital Audio and Television Broadcast. The highly-visible, back-lit LCD display simultaneously shows forward and reflected power or other selected parameters in digital format, while a 20-segment analog bar graph tracks forward power readings. Readings can be expressed as Watts, dB Return Loss and % Match Efficiency. VSWR is automatically calculated from forward and reflected power for fast, convenient antenna checks.

- Frequency Range: 2 MHz to 3600 MHz
- RF Power Range: 1 W to 1000 W
- Requires either the 5010 or 5011 Power Sensor
- Frequency and Power ratings are determined by the DPM Elements

RF Signal Samplers [470-10]

If you are buying these, you may need:

Tool Kits, Complete . . . . . page 1523

Variable Signal Sampler, Stand Alone

Adjustable BNC female port allows a 20-80dB attenuated signal up to 3 GHz to be either inserted or extracted from the test unit. The type N input and output can be changed by using RF Industries Unidapt connector ends.

rt No. y/Uom	Manufacturer Mfg. P/N Warranty	Freq. Range Power Rating	Connectors	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
3503 EACH	RF Industries RFA-4059-A 1 yr	20-3000 MHz 500 Watts	N-Male / N-Female	87.85 0.3 0.14	61.49 50.95 48.32

Variable Signal Sampler, Stand Alone

These signal samplers are "stand alone" wide range THRULINE RF coupling probes for spectrum analysis and signal observation using an oscillscope or frequency counter. They feature low VSWR and insertion loss of only 0.1 dB.

rt No. /Uom	Manufacturer Mfg. P/N Warranty	Freq. Range Power Rating	Connectors	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
3045 ACH	Bird Electronics 4275-020 1 yr	20-1000 MHz 1000 Watts	N-Male / N-Female	210.00 0.72 0.33	209.37 208.74 207.90

Plug-in RF Signal Sampler Element

For RF signal observation, spectrum analysis or frequency measurment. Non directional coupler delivers an unrectified signal at about -50dB+/- 2dB. Use with a Bird 43 or 4410 series wattmeter.

e No. Uom	Manufacturer Mfg. P/N Warranty	Freq. Range Power Rating	Connectors	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
866 ACH	Bird Electronics 4274-025 1 yr	25-1000 MHz 500 Watts	Plug in element. Fixed -50dB +/- 2dB.	95.00 0.22 0.1	94.72 94.43 94.05

Dry RF Load Resistors [470-20]

If you are purchasing these, you may need:

Tool Kits, Complete. . . . . page 1523

Loads

For use in unused combiner ports or as dummy loads for alignment purposes (50 ohms).

AVO MEGGER T1 Testers

414269

The Megger InterroGator 10T1 and 20T1 are compact, feature packed T1 handheld test sets that can be used for in-service or out-of-service testing. They have been designed to evaluate the integrity, configuration and performance of a T1 facility by locating complete failures in a transmission line or a piece of equipment, verifying network performance, isolating faulty DTE or DCE and determining faulty tranmission channels. Complete end-to-end testing may be performed at any point in the span by utilizing industry standard loop codes. The units may be used at the DSX-1 cross connect jack panel, bridged onto the span or can be a substitute for transmission equipment for real world testing. Telco Installation and Maintenance personnel of Private Networks and Service Providers who are responsible for turning-up and maintaining their DS1 and HDSL/2 spans are perfect candidates for the the MEGGER InterroGator. Cellular providers who need to measure network delays associated with cellular service would also use the InterroGator.

- MEGGER InterroGator Hand-held T1 Span Verifier and Tester
- Truly portable field test set, ideal for outside plant ap
- Determines T1 framing and BERT patterns
- Model 10T1 provides T1 BERT results for Bit, BPV, Frame, CRC6, and Errored seconds
- InterroGatr 10T1 alarm results: Signal present, out of fram, Pattern sync loss, Excess zero, Ones density and DS1 idle code
- Measures DS1 level and frequency in volts and dB
- Detects timing problems clock slips, measures DS0 level and frequency
- InterroGator 20T1 additional features: Smart Repeater T1 loop codes
- Transmits standard HDSL T1 loop codes
- Half-duplex Drop & Insert testing, Detects DTMF, High contrast 4X20 LCD display
- Model 20T1 performs BERT on one of 17 standard stress patterns and two user-definable 32-bit patterns
- Expanded suite of test patterns, G.821 performace analysis, Printer port.
- Power: 3.6V 4 ah NiMH (8 hours) Low battery indicator
- Dimensions: 1.75" X 5" X 9" Weight 1 lb. 10 oz.
- Includes: 5 ft. Bantam-to-Bantam cable, Power Supply, Carry Case and Manual

Acterna T-BERD T1 Analyzer

The T-BERD 107A delivers complete T-1 testing power in a rugged, handheld battery-operated package. The front panel LEDs and results summary display give you an immediate view of results. Battery lasts up to four hours. Features include auto-configuration mode to reduce test set up time, automated BRIDGTAP and MULTIPAT tests, channel monitor for troubleshooting DSO problems, and fractional T1 capabilities for BER testing on contiguous and non-contiguous FT1 bandwidths. All units include soft carrying case, printer cable, and AC adapter/charger.

- T-Carrier Service Provider Package P1 Features Includes:
- SLC Decode (107A-1) Subsciber Line Code
- Advanced Stress Patterns (107A-2) advance BERT stress pattern for T1 qualification
- Enhanced ESF (107A-3)
- Smart Loopback/Command Codes (107A-4) ability to loop CSUs, Smart Jacks, Repeaters
- Fractional T1 (107A-5)
- Power: AC adapter 120 VAC and lead acid battery 4 hours life
- Dimensions: 8.5" H x 4.25" W x 3.25" D Weight 4.5 lbs.

FLUKE Networks QuickBERT-T1 Tester

The Fluke 635 is a compact, handheld T1 test set fo construction installation and troubleshooting applica tions. It performs bit-error tests, detects framing typ line coding and bit pattern, and displays signal level, fr quency, clock slips, errors and alarms. The 635 trans- mits the most commonly used loop codes, including HDSL. Full, unframed and fractional (56K abd 64K) T are supported, along with display of signaling and dat bits and capture of DTMF digits. Plus, individual voice channels may be monitored on the built-in speaker o over a headset. The 635 is compact, lightweight, rugg and easy to use. Just plug it in and you can immediat see essential information without scolling through la ers of menus.

- Full featured, handheld T1 test set
- Instantaneous detection and display of framing, line coding, errors, alarms, level, frequency and more
- Transmits and receives common Bit Error Rate Test BERT patterns
- Connectors: Rx T1 Receiver Term/Mon/Bridge, Tx T1 Transmitter, Ref T1 Receiver: Bantam jack
- Power: Battery Pack: rechargeable, NiMH Life 6 Hrs. with low battery indicator
- Dimensions: 1.75" x 5" x 9" L Weight 1 lb, 10 oz.

Acterna T-BERD T3 Analyzer

The T-BERD 307 goes wherever it is needed. Test fro central office to the customer premises, and anywhe in-between. Monitor and analyze DS1 tributaries at D access points. Troubleshoot DS1 signals while verifyi DS3 circuits. Simulate network equipment and loop- back customers equipment. Options include: DS1 tin ing slips, multiplexed DS3 patterns, individual DS1/D transmit and receive ports, VF Channel monitoring a auto-detect to DS1/DS3 framing and pattern.

- Features Include:
- Quickly identify timing impairments, a common source of errors in asynchronous and synchronous networks
- Access the DS1 timing reference from DS3 or DS1 access points
- Simulate a multiplexer or a 3:1 cross-connect for DS3 and DS1 circuit qualification
- Listen to individual VF channels, measure VF level and frequency, and monitor ABCD signaling bits o all 24 channels
- Use the T-BERD 307's unmatched flexibility to tes from multiple access points in the network
- Quickly generate hard copies of test results with the T-BERD 307's printing feature
- Dimensions: 8.5" H x 4.24" W x 3.25" D Weight 4.2 lbs.

Acterna TestPad 2000 Software Options

ACTERNA

- Modular TestPad 2000 Platform architecture enables up-to-date support in a single platform
- Advanced Stress Patterns-ASP: Transmit and receive fixed long patterns beyond standard patterns T1 patterns are designed to stress test the timing recovery circuits and span-line repeater ALBO circuitry
- Fractional T1-FT1: contiguous and noncontiguous, 56KxN and 64KxN, FT1 testing capabilities, qualification and testing of new FT1 circuits before connecting equipment, V.54 FT1 loopcode allows single set testing of FT1 circuits from T1 access point
- VC PCM TIMS: listen PCM encoded signals with built-in speader and no-intrusive monitor signals with two T1 receivers, measure VF tone and level transmit tones on individual PCM channel basis, variable frequency/level tones transmitted, noise measure
- Signaling SIG: ability of PBX/Switch to handle incoming calls, receive and monitor calls over several trunk types, send/receive DTMF digits to/from switches and PBX, dial-up VF circuits, measure inter-delay and digit/tone duration
- Primary Rate ISDN PRI: place and receive multiple voice/data calls, D-channel backup, support NFAS, support multiple call types 56K, 64K, Nx56 and HO
- VT100: enables user to switch from BER to VT100 terminal Emulation monitor or provision network elements performance monitoring NIUs or HDSL terminal units via RS-232
- ILE Intelligent Line Equipment: provides loop up and down individual T1 addressing repeaters, line repeaters, transmit switch commands, loop up and down HDSL, supports T1 equipment
- GSM Testing: full rate and enhanced full rate traffic monitoring, GSM results with TRAU frame values, Monitor the quality of GSM digital wireless traffic
- GSM LAP-D signaling results TRAU framing results, Measurement report message results average uplink signal quality and signal level
- TestPad required software options uploaded via PCMCIA card

Acterna TestPad T1/T3 Service Kits

- Easy-to-use, touch-screen graphical user interface (GUI) simplifies and expedites testing
- Dual PCMCIA slots support easy installations of future upgrades
- Combined with DS1, DS3, ISDN PRI, and GSM features, provides an all-in-one solutions for high speed testing the TDM portion of the wireless networks
- Verify network routing ensuring all fractional T1 channel signals are terminated properly and with the correct timing
- Test the ability of a PBX/Switch to handle incoming calls
- Monitor the quality of GSM digital wireless traffic
- Each Kit Includes: TestPad 2000-V3 UIM, Kickstand, AC adapter/charger, Nylon Case and strap, and printer cable

Acterna SONET Services Module

The Acterna 2310 communications analyzer is a hand held, easy to use test set designed to test signal rates from DS0 to OC-48c. Quick, intuitive, and weighing only five pounds. Multiservice testing capabilities including ATM, GR-303, ISDN, signaling, voice frequency (VF), and digital data services (DDS). Optional SDH (2416) and 10-GBit (2510) service modules.

- Application Modules:
- Dual T1 Tx/Rx, with single DS3/STS1/OC-3, OC-12, and OC-48
- Standard connectors are FC Optional SC and ST connectors Available for OC modules
- Optional Software PCMCIA card: ATM-OC-3c and ATM OC-12c Analysis, ASP Advance Stress Patterns, FT1 Fractional T1, DDS Digial Data Services, GR-303 analysis, ILE Intelligent Line Equipment, and PRI Primary Rate ISDN see Software Table
- Supported Application Modules Include: 2207 T1/T3, 2109 Copper Analyzer, 2357 DSL Broadband, 2310 SONET, 2416 SDH, and 2510 10-Gig Services Modules see Module Table
- Connector Type for DS3 and STS1: WECO 560A jack for DS1 Bantam jack
- Dimensions Overall: 7.5" x 11.5" x 2.25" Weight: 5 lbs.
- Each Module Includes: Large Carrying Case, Charger and Printer Cable
- REQUIRES TestPad 2000 (415132) must be ordered Separately

Acterna T-BERD Channel Access Tester

With the constant demand for new services (T1, Fractional T1, GR-303, ISDN, DS3, STS-1, Caller ID, DDS. SS7) you need the capability to test multiple technologies without requiring multiple instruments. TTC's T-BERD 224 PCM Analyzer provides a powerful testing solution that handles all these services and still allows a high level of customization. A host of flexible and field-upgradeable options allow you to test services as soon as you add them and to cu tomize the T-BERD 224 to meet your specific requirements.

- Options Include:
- G.821 Performance Analysis to compare T1 under test to Bellcore specs
- Advanced Stress patterns for T1 qualification
- Fractional T1 option
- VF Option to send various tones for signal-to-not and attenuation analysis
- DSP, Digital Analysis, DDS, Primary ISDN, PRI/SS7 call trace, ESF/SLC, and T1 BERT
- Smart LB/Command Codes

erna Data Test Unit

Acterna's Data Test Unit is designed to test wide area circuits and services. From DDS to T1, transmission facilities provide access for most of today's data users. In order to test these services effectively, you need to have digital access. The TPI 105 quickly isolates problems and minimizes your repair time, saving you time and money. This portable, rugged test unit accomplishes a full range of DS0, DS1, and T1/FT1 test options. Weighing only seven pounds and battery operated, it is ideal for downstream field testing by digital loop carrier (DLC) crews.

Agilent AuroraJazz ATM Network Tester

The Agilent AuroraJazz is a robust, portable tester pr viding all the functions necessary to ensure ATM net- works operate at their maximum efficiency. Use it to commission, maintain or troubleshoot ATM circuits. The AuroraJazz will accept two field interchangeable modules allowing a mixture of SDH, SONET or PDH line testing for complete physical layer, framing analysi and error reporting from 1.5Mbit/s to 155 Mbit/s. AT network tests include, emulate end equipment or tra mission network, fault finding, monitoring of network circuits, quality of service provided. The AuroraJazz offers high visibility LEDs configurable for any physica interface alarm

- Features Include:
- Performes Physical and ATM BERT for transmission line quality, and Physical Layer BERT testing on E1, E3, DS3, and DS1 interface
- Line Rate ATM layer testing traffic generation 256 Virtual Circuits, CBR or VBR Traffic Scanning, and Line Rate Cell Processing of 1024 recieved circuits
- Option Interface Modules:
- Module 1737A/010: DS3 and DS1 45 Mbit/s (ADM/ PLCP, C-bit/frame)1 Optical Single Mode 155 Mbit/s (SDH and SONET framing), SC connector
- Module 1737A/020: E3 34 Mbit/s (G.751 ADM/ PLCP, G.832 ADM, CAS and CRC), BNC and RJ45 connectors
- Module 1737A/030: OC3/STM1 Optical Single Mode 155 Mbit/s (SDH and SONET framing), SC connector
- Module 1737A/040: OC3/STM1 Optical Multimode and Electrical CAT5 UPT 155 Mbit/s (SDH and SONET framing) SC and RJ45 connectors
- Dimensions: 11.2"H x 9.8"W x 2.8"D
- Power: 6 cell NiMH "D" cells included and AC adapter Weight 5 lbs. 15 ozs.

erna FIREBERD 6000 Analyzer

FIREBERD 6000 is known for its excellence in physical layer testing, using modular plug-in aces and mainframe options, to test circuits and equipment operating at rates from 50 o 52Mbps. The 6000A performs ATM tests with the same instrument that you can per- Frame Relay, ISDN, and other WAN services.

ology Supported: ATM, Frame Relay, T1/FT1, x64, DDS Local Loop, Datacom, 34M, T3, nd HSSI

nal Interface Modules:

l Drop and Insert: Analyze the entire range of FT1 services regardless of data rates and for- with comprehensive BERT patterns

Local Loop: Tests D4 channel bank, Analyze ubrate circuits, and Testing 4-wire facilities to ner premises

- Data Module: Test an array of interface standards: V.35/306, X.21, RS-499, DTE/DCE
- ATM Package 6000AT: DS1/DS3 end-to-end testing from edge devices that acess ATM, ATM layer, AAL, TC layer and physical layer
- Standard Power: 120VAC 50/60 Hz

Agilent Frame Relay Analyzer

The Aurora Tempo is a comprehensive test instrument that helps you bring Frame Relay networks rapidly into service. It is essential for installing, configuring and maintaining Frame Relay service over V-series interfaces, and T1 circuits. It provides physical layer and Frame Relay protocol tests allowing you to verify service, or examine more complicated issues with real-time analysis, statistical analysis and detailed simulation for both Switched Virtual Circuits (SVCs) and Permanent Virtual Circuits (PVCs). Designed specifically for Public Telecommunications Carriers, CPE Installers and System Integrators, Frame Relay equipment manufactures and installers, WAN system integrators. Offers Physical analysis, Link Management, End to End routing, Stress Testing and Switch Emulation.

- Features Inlcude:
- Frame Relay Decoding with Extensive Statistics
- Large Display Intuitive menu system)
- Interfaces form Full duplex T1 or V-series (V.35, RS232, RS499, EIA-530, X.21)
- Full SVC and PVC Simulation and CIR Testing
- BERT results produced to full G.821 as absolute or percentages
- T1 interfaces 2 x Bantam connector for receive ports 1 x for transmit port and 1 x RJ48C
- IP PING Generation
- Stress Testing: Frame Loss, Frames with Discard Eligible (DE) and Frame throughput delay
- Power 6 x 1.5V D cells, 7.2V Ni-Cd rechargeable pack
- Includes: 2 Ni-Cad packs, Carry Strap, Case, 110VAC Adapter, serial port cables and manual
- Dimensions: H 11.0" x W 9.65" x D 3.0"

FLUKE Networks Frame Relay Assistant

The Frame Relay Installation Assistant automatically determines frame relay and line configurations, provides a one-button AutoTest to replace multiple-step provisioning procedures, and enables the frontline technician to run IP tests with limited knowledge of IP technology. The 660 can emulate Customer Premise Equipment (CPE) to determine whether a frame relay service is ready for use. The tester can also emulate Service Provider's Network (NET) to confirm access devices are configured correctly. The 660 can also be used as a basic troubleshooting test tool to monitor in-service links. The unique interchangeable interface modules supports four access interface types--DDS, T1/FT1, E1/FE1, and serial.

- Complete Hand-held solution for: Installing, Troubleshooting and Monitoring Frame Relay Networks
- Physical Layer Testing: for analyzing signal level, framing, line coding, errors and alarms, and stress testing with bit patterns
- Frame Relay Layer Testing: for reporting on LMI, DLCI's, congestion, losses and errors
- IP Layer Testing: verfying end-to-end connectivity for each frame relay PVC with built-in ICMP PING capability
- Model: 660T/TE Mainframe: Graphic bit-mapped LCD backlit display, Light weight (3 lbs.), NiMH battery powered and RS-232 Interface
- Test Results stored internally for downloads to PC or Serial Printer
- Software upgrades via PC interface
- Interface Modules: 660M-T1, T1/FT1 Interface with RJ48c jack (1-Rx and 1-Tx) Patch cable and Tap Box
- Module 660M-E1: E1/FE1 Interface with RJ48c jack (1-Rx and 1-Tx): Modules: 660M-DDS: 4-wire DDS interface with RJ48S jack (1-Rx and 1-Tx) Patch cable and Tap Box
- Interface Modules: 660M-S: Serial interface V.35, X.21, RS-449/V.36, RS-232/V.24 and RS-530 connectors and Serial extension cable
- Standard Features all modules: BERT Tests, Frame Loss, PING and AutoPING Tests,
- Optional Internet Throughput Test 660-ITO interoperates with One Touch or another 660 to provide a two-way WAN to LAN IP throughput test providing upstream and downstream results Field Upgrade

Agilent Multi-Function Service Advisor

The Agilent Service Advisor is Agilent's newest state-of-the-art platform for deployment tes ing, installing, commissioning, and maintaining telecom and datacon network services. The po table test tablet includes a bright 6.4" Touch Sensitive Color VGA screen and with advanced Windows CE operating system and Generic User Interface, provides an easy to use and ver tile tool for Central Office and outside plant services. The modular test design enables users rapidly switch test applications for first tier field deployment and 2nd/3rd tier regional suppo

- Features Include:
- Interchangeable Test Modules accepts 2 single width plug-in modules or 1 dual plug-in module for testing DSL, TIMS, TDR, ATM, SONET/SDH, Datacom, and DS1/0
- Rapidly change interface with "Hot Swap" capability
- Optional Interchangeable Modules:
- Module N1625A/110: xDSL TIMS Test Module comprehensive subscriber loop testing 2 MHz for DSL including ADSL, HDSL, SDSL and IDSL and analog VF-POTS with 36 individual tests
- Module N1610A: Dual DS1/0 Test Module with Dual Rx and Tx, T1 and Nx56kbps and Nx64kbps BERT, Unframed ESF, SF and SLC-96, and T1/DDS
- Module 1690A/010: Datacom Test Module verifies RS-232, RS449, V.35, X.21 and EIA-530 links up to 52 Mbps with DTE, DCE monito modes and BERT test & Clock Generation
- Module N1627A: TDR Test Module range 10FT to 20,000FT, Crosstalk and Return Loss, with Waveform Storage and Comparison
- Module N1640N & N1645A/112: ATM Cell Processor & SONET/SDH Interface Modules (required combination)
- Dimensions: 11.5" H x 8.2" W x 3" D Weight 5.4 lbs.

xDSL and ISDN Network Analyzers [765-30]

Harris TS1000 ADSL Test Set

The TS1200 ADSL Test Set gives the line technician a greater range of analysis capability for field installations, and is ideal for the Information Technology (IT) manager for reducing on-site repair expenses. Advanced features include the noise margin, power level and attenuation simply by scrolling up or down the navigation buttons. The TS1200 combines ease-of-use with advanced ADSL testing technology.

eatures Include:
- Quick and Easy ADSL Service Verification
- ynchronized with Alcatel-compatible ADSL SLAM
- isplays: Attainable and Maimum Bit Rate, Noise Margin, Relative Capacity, Output Power, Attenuation, and Channel Bit Rate
- lash-proof Keypad
- Supports ANSI T1.413 Issue 2, ITU G.DMT, and G.Lite Standards.
- Dimensions: 3.94" W x 8.31" H x 2.17" D Weight 1.3 lbs.
- Power: 4 (AA) batteries 10 hours of operation
- Optional ADSL/POTS Splitter (sku 482031)

gilent AuroraPresto ADSL Test Set

The Agilent AuroraPresto ADSL handheld tester provides all the functions necessary for a technician to install, maintain, and troubleshoot Asymmetric Digital Subscriber Lines (ADSL) and services. Analog line testing. ADSL layer testing with "Golden Modem" operation and ATM layer or IP application layer testing are all easy using "one touch" fully automatic or manual expert mode testing for more in-depth diagnosis. Built-in 10 Base T Ethernet port for through line operation and IP testing. Select from up to 20 user defined test profiles for fully automated Go/No Go testing.

nulates Network from ATU-C (CO) to DTE odem or Remote ATU-R
nulating modem to DTE or DTE/modem to network
elden Modem through-line termination mode sting
e BERT and quality tests
M layer tests: AAL-5 statistics and analysis, ATM RT measurements
I/VPI statistics and errors

- Telecoms ADSL layer (T1.143, ITU-T G.992.1/2), IP layer (AAL-5 encapsulation, RFC1483)
- BERT Tests: CCITT and ANSI patterns with user defined and set PR selection
- Connectors: Line RJ11, Ethernet RJ45 socket, 10-Base T interface, RS232, Mini DIN
- Dimensions: L 11.25" x W 4.0" x H 3.42"
- Weight: 2.45 lbs.

Agilent AuroraPlus Basic Rate ISDN

The new Agilent AuroraPlus is an easy-to-use hand-held Basic Rate ISDN and POTS tester for central office or field technicians who need a reliable, simple and foolproof installation tool. Can test most ISDN call and connection types at the U-Interface and on the S-Bus, including point-to-point and point-to-multipoint operation. The product can display dialed and calling party number, cause codes (with explanation), along with control and status information, and can make simultaneous B-channel calls and perform a D-channel packet test. Performs BERT bit error rate test, line polarity, crosstalk. With optional POTS provides complete testing for analog lines.

- Features Included:
- Simple Navigation and menu Selection
- Loudspeaker Monitor Microphone and earpiece for Telephone Functionality
- Interfaces: S and U-line code 2B1Q
- AutoSPID and EasySPID Support
- Simultaneous B-Channel calls for Voice and Data
- Line Voltage Display to identitfy Interface Type
- RS232 Interface
- Protocols: AT&T 5ESS Custom, Nortel DMS-100 Custom, National ISDN
- Power Internal NiMH battery, AC converter/charger, or from line under test
- Low Battery Indicator
- Dimensions: 2.75" W x 9.25"L x 3.5" D
- Weight 1 lb. 8 oz
- Includes: S and U Interface with Cables, RS232, AT&T 5ESS, Nortel DSM-100, NI protocols, Batteries, Charger/Converter, Belt Clip, and Manual

Agilent AuroraDuet ISDN Network Tester

The Agilent AuroraDuet is designed to provide ISDN technicians and engineers an installation, troubleshooting and maintenance, integration, and product development simulation and monitoring tool. The Duet has the ability to emulate ISDN from both the network and customer sides, providing local loop testing, TE mode to validate ISDN service provided, T1 signaling capabilities, NT or LT mode for commission and set up equipment before delivery. Also offers monitoring and diagnostics, voice and data testing, and BERT statistics for G.821. The AuroraDuet is a cost effective simulator and analyzer with the sophistication to be used in a development and manufacturing environment.

- Combines Basic Rate, Primary Rate and T1 Tester
- Emulation, TE Mode, NT Mode, and LT Mode
- Multi-channel Simulation B1, B2, Bx for Basic Rate
- Establish 23 simultaneous calls in PRI Rate Mode, 11 simultaneous cross-connect calls for B-Channel
- Automatic B-channel cross connect BRI Rate mini-switch simulation
- Physical-layer 1 Testing, selective BERT capability for both BRI and PRI Rates
- PCM Circuit Testing
- Multi-Protocol National ISDN, AT&T, and Nortel
- Fully decode V5.1 and V5.2 Protocols
- Interface for U-2B1Q S/T interface for Basic Rate
- Dual T1 Interface for Primary Rate
- Battery Rechargeable Nickel Cadmium or AC operation
- All Modle Include: Carry Case, 4MB ROM & Monitor, AC/DC Adapter, RJ45, RJ11, Alligator Clips, and RS-232

FLUKE Networks WaveRunner Wireless LAN

442352

WaveRunner Compaq HP iPAC Pocket PC verifies 802.11b deployments. While detecting the rogue access points and clients that compromise the performance and security of the enterprise network. The WaveRunner gives you the visibility for managing both your wireless and wireline networks. This palm-sized device has a color touch screen that provides the necessary steps of wireless network deployment and troubleshooting. Wireless LAN design plan and measure access point location and configuration to maximize coverage while minimizing installation costs. Applications include Retailer lobbies, manufacturing floors, loading docks, educational and medical facilities. WaveRunner ensures your WLAN design can accommodate all.

- Wireless LAN Design: Perform channel assignments, access point location and security design.
- Deployment Verification: Verify wireless drops, signal coverage, channel interference, validate deployment and WEP- Wired Equivalency Protocol operation
- Rogue Access Point Detection; Identify unauthorized access points on the network and locate rouge equipment compromising network's security
- Capacity Management: Traffic View feature determines network traffic load of increased users to decide if the AP can support more clients, also determine what is slowing down the network
- Compliance: IEEE 802.11b, PMCIA Spec. 5.1, Interoperability: WECA Wi-fi for 802.11b
- Operating Range: 1500 ft. Outdoor, 300 ft. Indoor
- Data Rate: 11 Mbps, Infrastructure Mode: BSS, Ad Hoc Mode: IBSS
- Compaq HP iPAC: Color TFT, power: 120-240 Vac, 50/60hz
- WaveRunner Kit Includes: Compaq HP iPAC loaded Linux and WaveRunner application, PC card sled, LAN adapter, holster, charger and Serial/USB cradle

FLUKE Networks NetTool Inspector

NetTool Connectivity Tester Standard (NT) tester, provides single-ended testing of cable and desk-top-to-network connectivity. It shows when a network drop is hot and identifies the service and the device on the other end. It also shows speed and duplex settings and checks the health of frames being sent. The NetTool InLine (NT-IL) tester is a must for network and PC technicians who install or troubleshoot network PCs. Unique inline functionality allows users to eavesdrop on the complex PC-to-Hub link pulse negotiation process. They no longer have to depend upon difficult-to-understand PC/ Switch configurations screens to resolve link connectivity issues.

- Conclusively identifies a jack as Ethernet, Phone, Token Ring or inactive.
- Checks link pulse for speed, polarity, duplex, level information and receive pair.
- Simultaneously monitors network health (frames sent, utilization, broadcasts, errors, collisions) for full-duplex connections.
- Shows protocol mismatches between the PC and the network, and identifies unwanted protocols that waste valuable bandwidth.
- Cable Tests: Wiremap, cable length, opens, shorts, and split pairs.
- Ports: Shielded Hub/NIC connector RJ-45, serial port - 2.5mm input jack
- Power: Alkaline batteries (20 hours), optional rechargeable NiMH battery or AC adapter
- Dimensions: 5" x 3" x 1.7" Weight: 0.46 lbs.
- Standard Accessories Included: NetTool tester, serial cable, AA batteries, wiremap adapter, manual (CD-ROM) and reference guide and NetTool Blaster Utility Software

FLUKE Networks LinKRunner

492318 491307

The Fluke Networks' LinkRunner is the first line of defense against problems at the physical and link layers of the network. Allows technicians to determine whether the drop is active, a cable problems, tracing the cable path and whether they can PING other network resources.

- Performs the following Tests: Link capabilities, Lengths and faults, PING--Verify connectivity to key network resources
- Cable Tests: Lenghts, opens, shorts, splits, wiremap, crossed and straight through
- Identifies: 10BASE-T, 100BASE-TX full or half-duplex, Token Ring, Telco, Cable ID, un-powered PC or Hub, Auto-MDIX ports and Auto-Negotiation or strapped port
- Power: 2-AA batteries, Optional NiMH batteries with charger
- Dimensions: 2.75" x 3.75" x 1.25"
- LINKRUNNER Test Kit Includes: LinkRunner, Cab ID (1-8), Wiremap adapter, RJ-45 coupler, Micro-probe Tone, NiMH battery and charger, Custome Carrying Case and PC Inspector

FLUKE Networks OneTouch Network Tester

The Fluke OneTouch offers just one touch of the AutoTest icon to display the connectivity status of c top stations, routers, servers, and switches. The sim user simply touches any component to receive in-de information. The OneTouch eliminates guesswork b automatically identifying Novell, Windows NT, and I BIOS servers. Offers troubleshooting of TCP/IP net works easily, by graphically displaying TCP/IP server printer, routers, and switches as well as duplicate IP addresses, subnets and SNMP devices. The Network Assitant also solves troubleshooting wiring problem automatically identifying crossover cables and hub uplink ports. The ITO Internetwork Throughput Option, enables IP performance testing during the installation and maintenance of Enterprice backbon WANs, and VPNs.

- Standard Version offers: Cable Testing, Network Health, TCP/IP and Switch Discovery, Remote Web Monitoring.
- PRO Version additionally offers: Remote Web Control, Device to Switch Port Mapping, Configuration Master, and Key Device PING
- Includes: Rechargeable NiMH battery, Holster, Soft Case, AC adapter/charger, remote wiremap(#1) Manual (CD-ROM), trial version of Ethernet Utility software.
- Dimensions: 8.7" x 4.7" x 2.5" Weight 1.7 lbs.
- ITO Option: Measures IP throughput across a cam pus backbone, Tests IP performance accross WA Baseline congestion when installing a VPN
- Options Include: Reporter Software, Fiber Test K (DSP-FTK), Tone Probe (Fluke-140), Cable Identi ers (#2-6) Hard Carrying Case, and xDSL option

Agilent Network Performance Analyzer

The Agilent FrameScope 350 features an easy-to-use color touch screen and powerful network discovery capability that allows network installation and maintenance technicians to survey the network and generate a list of work stations, switches, routers, servers and other network devices. Performance evaluations to automate and simplify network service testing and pre-qualification, pinpointing errors and mis-configurations to quickly diagnose and troubleshoot network problems. User can identify 10/100 Mbps Ethernet Utilization, broadcast, collisions and errors, or quickly pinpoint incorrectly assigned subnet masks, misconfigured servers and duplicated IP addresses.

- FrameScope 350 test suite measures & rates response times of network resources web, files, e-mail, print DNS and DHCP servers
- Verifies performance of vital network services as well as full Category 6 cable certification
- Remote Control through web browser allow operation from any location on the network
- Supports: Autotest, verifies performance of e-mail, Web, Files, DNS, DHCP, WNS, Novell, Print, FTP, Primary DC, Secondary DC servers, Switches and Routers
- PING, Trace Route, & SNMP Queries to verify connectivity to define devices
- Statics a snap shot of network conditions, Traffic Generator to test under heavily loaded conditions
- MAC Loopback measures throughput, loss, delay and variations across and Ethernet Network
- Blink Hub Port locates live network connections
- Power: Re-chargeable NiNH batteries, Life 5-hours (network) & 8-hours (cable test)
- Dimensions: 9" x 4.5" x 2.6" Weight: 2.6 lbs.
- Standard Kit Includes: FrameScope 350, 32MB Flash memory card, Cat. Channel adapter, AC power cord, Strap, Serial cable, Nylon Carrying Case, Utility Software-CD, Users Manual
- Options: Dual Remote allows performace of level III Cat. 6 cable certification, provides all required testing from far end of cable
- Multimode & Singlemode Fiber SmartProbes, Coax Test Probe (sku492131), Hard Carrying Case (sku410139), TalkSet (sku465146) and Link and Channel Adapters
- FrameScope 350 Professional Fiber Test Kits Includes: FrameScope 350 Kit plus: Dual Remote, Fiber SmartProbe (SM,MM), TalkSet, USB cord, Calibration Cable, and Hard Carrying Case.

AMREL Telesense 185T Line Tester

The model 185T is the most basic model in the Telesense series and includes noise measurements (dBm) and meets or exceeds , Bell PUB 41009, IEEE 743-95.

- Features: 20 KHz Bandwidth, TRMS level Measurement
- DMM: VDC, VAC, Ohms, Loop Current
- Signal Generator: 404/1004/2713/2804: Rx 600/900/1M ohm: Tx Impedance 600 ohms
- Rx levels: -50 to +13 dBm, Rx Noise: -80 to -32 dBm
- Power: 9 VDC Battery, Weight 12.4 oz.
- Dimensions: 6.9" X 3.4" X 1.4"
- Includes: Vinyl case, Stand, 9Vdc battery, 2 Bantam to alligator test leads and manual

AMREL Telesense 1000 Line Tester

The Telesense series offers a rugged hand-held transmissions line test set with DMM functions for POTS, Dial-up Modems, and Data Circuits, designed for testing during installation, provisioning and troubleshooting leased lines and dial-up circuits.

- Applications: POTS line testing, 2-Wire dial-up modems and 4-wire leased lines
- Features: 20KHz bandwidth, TRMS level measurements
- DMM: VDC, VAC, Ohms, Loop Current
- Frequency counter 20 KHz; Tone generator 404/1004/2731/2804Hz, Level fixed 0 and -13dBm
- Rx Level Measurement: -50 to +8 dBm
- Rx Impedance: 600/900 ohms, Tx Impedance: 600 ohm
- Noise with C-Message weighting filter, Noise Level -80 to -10dBm
- Dimensions: 6.9" X 3.4" X 1.4" Weight: 12.4 oz.
- Power: 9Vdc battery, Connector: Bantam
- Includes: Hard leather Carrying Case, Removable Stand, 9Vdc alkaline battery, Two(2), three foot Bantam to Alligator leads and manual

Tempo Sidekick Stress & Leakage Tester

The Sidekick 7B is ideal for troubleshooting twisted pair. This lightweight, hand-held meter quickly and accurately uncovers intermittent troubles. Technicians can identify faults in locations ranging from outside plant inside wiring, and for closures to connecting blocks. A standard in the industry in telephony, LAN/WAN, Private Networks, and BICSI applications.

- Measures: Resistance, AC/DC Volts, and Capacitive kick
- Stress Test reads the audible noise produced on a faulty pair that is stressed @ 90dBm excitation
- Leakage Test: uses 135 V to push (kick) the oxide layer and reveal faults
- Provides tone for twisted pair or crossed conductor location
- Single setup for Tip-Ring, Tip-Ground, and Ring-Ground testing
- Low Battery Indicator, Power: 4 AA Batteries
- Dimensions: 10.75" x 4.25" x 2.5" Weight 2 lbs.
- Includes: Soft Case with Stand, Field Replaceable Leads and Batteries

Triplett Transmission Test Sets

The Model 2 combines the features of a transmission test set and a multi-range volt-ohmmeter in a convenient hand-held package that operates on two 9 volt batteries. Complete with 74" combination Test Set leads, 48" Volt-Ohmeter leads, batteries, and instruction manual.

- Features: Quasi-RMS detector, Full Range DMM: AC/DC Volts and DC Current
- Circuit Loss (60KHz to 10kHz), 735 ohms
- Circuit Noise, C-message filter
- Line Holding Current (20 to 30 mA)
- Dimensions: 7 1/8" W x 3 5/8" H x 2" D, Weight: 1 lb. with battery

Telephone/LAN Line Testing Equipment

AMREL Telesense 2000 Line Tester

The Telesense 2000 is a Basic, Low Cost, Rugged Hand-Held Transmission Line Test Set with DMM for POTS, Modem, Leased lines or Data Circuits. This model has dual range frequency counter (2Khz &20Khz), additional RX level at 135 ohms plus a high Z bridge at 100K ohms. The original generator level range has been increased to a variable -26dBm(fixed -13dBm with the Telesense 1000) and has optional (Responder/Commander) Module, DTMF generator for dialing and activating remote responders via 2 wire/4 wire transmission lines (TELEDIALER) and Line Hold Circuit, features that are not available with the 1000 series.

- eatures: 20 KHz Bandwidth, TRMS Level Measurement DMM: VDC, VAC, Ohms, Loop Current
- Dual Range Freq. Counter 2KHz & 20kHz
- recision, balanced 4 tone generator
- Noise with C-Message weighting filter
- ignal Generator (404, 1004, 2731, 2804Hz): Level /ariable 0 to -26 dBm
- x level measurement (+10dBm to -60dBm) Noise -0 to 0dBm
- Rx Impedance: 135/600 & 900ohm: Bridge Z: 100K ohms
- DTMF responder/commander (optional Teldialer)
- Dual Frequency Counter 2KHz and 20 KHz
- Power: 9Vdc ni-cad or alkaline battery, Connector: Dual Bantam and RJ11 Jack
- Dimensions: 6.9" X 3.4" X 1.4" Weight: 12.4 oz.
- Includes: Black Heavy-Duty Nylon Holster, Removeable stand, 9VDC battery, two 3 ft. Bantam to alligator test leads and manual

empo Sidekick Transmission Tester

The Sidekick T&N full function tests identifies frequency missed faults Reduces repeat service calls and eliminates service interruptions. The Sidekick's analog meter and rugged, lightweight design, combines quality loop testing for POTS lines.

- easures: Resistance, AC/DC Volts, and Capacitive ck, Stress and Leakage Tests
- nsmission and Noise Testing, plus Loop Current, rcuit Loss, Metallic Noise, Power Influence Test-, and Load Coil Detection
- gle set-up for Tip-Ring, Tip-Ground, and Ring-round
- Low Battery Indicator, Power: 4 AA Batteries
- Dimensions: 10.75" x 4.25" x 2.5" Weight: 2 lbs.

Ameritec Personal Transmission Test Sets

The AM-48 and AM-44 Personal Transmission Test Sets are designed for personal or field testing, about the size of a handhed calculator, they are world's smallest full function voice and data transmission test set. These very precise insturments measures signal level (loss/gain), frequency , frequency shift, idle channel noise with C-message or 3-kHz flat filter, noise w/tone using C-message and notch filter, signal to noise ratio with direct readout in dB and the P/AR (peak to average ratio) benchmark test.

- Standard Features for AM-44 and AM-48:
- Transmit Frequencies: 200 Hz to 5kHz (AM-44); 200Hz to 20kHz (AM-48)
- Receive Frequencies: 200Hz to 20kHz (AM-44): 200Hz to 20kHz (AM-48)
- Three-level impulse noise measurements(drops,gains,impulse noise)
- Termination Impedance: 600 or 900 Ohms
- Phase jitter and amplitude measurements
- Additional Features AM-48: Transmit Sweep, Return Loss, Hits Measurements, and DMM Functions (AM-48 Only)
- Return Loss (AM-48 Only)
- Hits Measurement (AM-48 Only)
- DMM Function (AM-48 Only)
- Standard Accesories Included:
- Input Cable, AC adapter, 4-AA Batteries, Case and Manual
- Optional Accessories: Portable Printer AM-47

AMREL 50 KHz Enhanced TIMS Test Set

The 180 Series line of Professional, hand-held TIMS designed for testing during installation, provisioning and troubleshooting of DSL, ISDN, DDS, leased lines, dial-up and POTS circuits. Provides Noise and Attenuation for Wireless, Carrier and Microwave circuits. Combines the functions of four test instruments into one compact unit and all functions are easily accessed through the front keypad and menu drive for simple operations. The unit features a 20Hz-50Khz synthesized sine wave generator, a full featured transmission test set, an autoranging DMM (186T), tele-phone handset with dial, talk and listen capabilities. An RS232C interface allows communications between the 180 and a host computer.

- Features: 20-50 kHz bandwidth, TRMS level measurements
- Measures: Noise, Noise w/tone, Noise to ground, Impulse Noise Levels
- Tx Level: +10 to -50dBm; Rx Level: +10 to -60dBm
- Noise Filters: C-Message, 3kHz & 15kHz
- Frequency Counter, Butt-Set w/dial (DTMF, MF, & DP)
- Additional Features 188T: Phase & Amplitude Jitter, P/AR, Hits Measurements
- Applications 188T (only): Voice over (VoIP), Voice over (VoDSL), ISDN-U interfaces
- Additional features 186T: Full DMM functions; DC/AC Volts, AC mV, DC current, Ohms & Capacitance
- Applications 186T (only): ISDN-U interfaces , DDS, POTS, & 2B1Q circuits
- Power: 4 "AA", Ni-MH, AC Power Adapter (12VDC), Auto Shut-Off
- Connectors: Bantam/RJ45
- Dimensions: 10" X 4" X 2.5", Weight: 2 lbs.
- Includes: Heavy-Duty nylon case, 2 Bantam to alligator leads, RJ45 to RJ45, RS-232 cables, Printer adapter, PC adapter, AA NiMH batteries, power adapter and manual
- Optional: Input Impedance 135/600 ohm, Optional Printer and ITU-T European versions

Agilent TIMS Copper Pair Tester

The Agilent LT2000 Copper Pair line tester is an easy to operate, battery operated and cost effective field instrument for verifying the quality of copper pairs for analogue and digital transmission with a bandwidth of up to 2 MHz. Performs measurements for Noise, Level, Attenuation, Crosstalk, and Return Loss for a variety of transmission systems including Base Band, 160 kbit/s, 1.5Mbit/s, 2 Mbit/s, HDSL and ADSL services. The LT2000 can provides all of the information required to deploy or maintenance troubleshoot copper pairs used for a Digital Subscriber Loop (DSL).

- Automatic Measurements in Sweep Mode include: Noise or Level with RMS readout, Return Loss, Near Crosstalk
- Level Generator Output Frequency Bands: 1 Hz from 200 Hz to 10 kHz, and 100 Hz from 10 kHz to 2 MHz
- Tracking with Tx Frequency 200 Hz to 2 MHz
- Level Measurements: Absolute dBm and Relative dBr
- Input Range <-100dBm to +5dBm/res. 0.1 dB
- Return Loss >40 dB with normal load
- Noise Floor (Tx off) <-100 dBm at 600ohm, <-95 dBm at 120 or 150 ohm
- Power Internal NiMH rechargeable battery
- Dimensions: W 3.9" x D 1.6" x H 8.2" Weight: 2.2lbs

Fluke Networks CopperPro Loop Tester

CopperPro is a handheld, multifunction OSP test set. CopperPro offers a broad range of Plain Old Telephone Services (POTS) troubleshooting, fault location and line qualification capabilities. Its Wideband/TDR option adds high frequency transmission testing and qualification functions for services like ADSL, HDSL and HDSL2, ISDN, T1, E1 and DDS. The TDR feature of the option adds precise fault location and analysis. CopperPro's POTS applications including voltage, opens, shorts, balance, RFL, VF noise and loss, terminated and dial-up tests, load coil detection and line monitoring. The Wideband/TDR delivers accurate fault location capability. Test and compare pairs, store measurements and test for crosstalk between pairs. The Wideband/TDR option also includes everything you need to qualify and troubleshoot lines for all standard digital services. Within seconds, the unique ADSL AutoTest determines whether a pair can provide ADSL service - even predicts upstream and downstream rates and bits per frame.

- CopperPro is a power packed advanced subscriber line test set
- Qualify POTS services: Caller ID, Auto Number Identification and dial-up modems
- Qualify digital broadband services: ADSL, (DMT & CAP), T1, E1, DDS, ISDN, HDSL, and HDSL2
- Measurements: Full Function DMM, RFL, Load coils, Tracing tones, VF Noise, VF Loss, VF Longitudinal Balance and send VF tone
- Model: 990DSLWT Wideband/TDR Additional Features: WB, Noise/level, Loss, Longitudinal Balance, Send WB tone, and Impulse Noise
- 990DSLWT: ADSI Autotest, and Data Rate Protection
- 990DSLWT: TDR 135 ohm, adjustable pulse-width, Range: 30,000 ft. (9144m)
- Power: AC Adapter with re-chargeable internal NiMH (16Hours).
- Dimensions: 9.8" X 5.3" X 3.2" Weight : 4.0 lbs.

Megger Cable Length Meter

The Megger cable length meter is a hand-held unit that measures the length of telecommunication, data communication, RF, small signal and power cables on drums, in cut lengths or in installed sections. Ergonomically designed, robust and simple to operate.

- Display of cable length or distance to fault
- Internal library of standard cable types
- Cable types UTP, STP, FTP, Coaxial, and Multicore
- Selectable impedance and velocity factor
- Impedance range: 50, 75 and 100 ohms
- Ranges: from 0 to 328ft. and 328ft to 6560ft.
- Accuracy: +/-5% or 1.5ft.
- Dimensions: 8" H x 3" W x 1.5" D Weight 0.55lbs.
- Power: 9V alkaline battery

Megger Cable Fault Tester

The Megger SCT500 structured cabling tester identifies all common wiring faults, including split pairs, opens and shorts, on both screened (STP) and unscreened (UTP) cabling. Tests are in accordance with TIA568A/B, ISO11801, EN50173 and USOC standards. The SCT500 has a built in TDR for measuring cable length.

- Cable Types: 4 Pair UTP, 4 pair STP, 4 pair FTP, USOC, 568A/B
- Fault Indicators: Short, Opens, Crossed Pairs, Split Pairs, Miswires and Screen Faults
- Cable Length measurement form 6.5ft to 395 ft.
- Accuracy +/- 1.5ft (6.5 to 33ft.) 5% rdg. (33 to 395ft.
- Optional Remote identifiers
- Built in tone generator for cable location
- Dimensions: 8" H x 3" W x1.5" D Weight 0.55 lbs
- Power 9V alkaline battery

Fluke LAN MicroMapper

For fast, comprehensive LAN Wiremap verification Whether you're an electrical contractor, a home ne working professional, datacom specialist or IT/netw manager, the Fluke Networks MicroTools family of powerful Voice/Data/Video (VDV) verification and t bleshooting tools will allow you to verify your wor while delivering a quality installation. The MicroMap perø is a small handheld cable tester which enables work professionals to quickly and easily verify the integrity of Ethernet twisted pair cabling.

- Testing of twisted pair cables for open circuits, shorts, crossed pairs, reversed pairs and split pairs
- Length for split pair 2 Ft. (min.), Twisted pair over 656 ft. (200m) Max.
- Power: 6 V alkaline battery
- Dimensions: 4.93" X 2.05" X 1.18", Weight: 0.28 lbs.
- Includes: Remote, patch cable, carrying case, 6V battery, and users guide

Fluke MicroScanner Network Cable Tester

The essential all-in-one network tester . Whether you're an electrical contractor, a home networking fessional, datacom specialist or IT/network manage the Fluke Networks MicroTools family of powerful Voice/Data/Video (VDV) verification and troublesh ing tools will allow you to verify your work while d ering a quality installation. This powerful tool is designed to prevent and solve cable and wire instal tion problems allowing you to confirm continuity, w ing configuration and the location of cable faults, sa you time and money at every installation.

- Verifies 10/100 Ethernet Measures cable length and distance to faults via Time Domain Reflectometry (TDR) technology Test twisted pair and coax cable Matches (UTP or coaxial) cables to offices during adds, moves and changes
- Applications: Shielded (STP) and UTP cable; 75 or 50 Ohm Coaxial cable; 10 Base-T or 10/100 Base-T networks
- New active network identification mode flashes hub ports and shows you if a network tap is operating at 10Mbps or 10/100Mbps and whether it is full or half duplex capable. It also identifies workstations by displaying PC.
- Office/Room function, which allows you to identify cabling drops for an office or room during adds, moves and changes. It helps determine routing at the patch panel and documents twisted pair and Coax networks easily.
- Measures length on all 4 pairs and displays in feet or meters; max length 1500 ft (457 m)
- Faults detected: Opens, Shorts, Reversed pairs, Swapped pairs, and Split pairs, distance maximum length: 656 ft (200/m)
- Options: Wiremap Adapter allows the MicroScan ner Pro to check if the cable under test has the rect wiring scheme
- Bare Wire Adapter: Allows you to verify two-wir networks like speaker wires, security networks telephone cabling
- Office/Room ID's: Allows you to document a co pleted installation. They will help you identify cab drops for an office or room during adds, moves changes (MACs).
- Coax Adapter: Used to verify coaxial cabling
- Dimensions: 5.5" x 3.25" x 1", Weight 1.1 lbs. Power: 9 Vdc battery

Telephone/LAN Line Testing Equipment

Luke Networks LAN Verification Tool

The Fluke 620 allows the installer to immediately verify that end-to-end connectivity is defect-free, in all category UTP LAN cables and hardware, as well as STP, FTP, and coax types. The 620 can detect open circuit and the length to the open, a short, and distance to the short circuit, and a split pair condition.

- ne person operation
- sts all LAN cable types: UTP, STP
- etects a multitude of wiring crossed, reversed, lit pair
- easures cable length from 1 to 999 ft. Accuracy
- Power: 2 AA batteries
- Dimensions: 7.25" H x 3.87" W x 1.8" D
- Weight: 12.5 ozs
- Optional cable Identifiers

UKE Networks OMNIScanner 2

The OMNIScanner 2 provides advanced certification for Cat 5/5e/6/7 cabling links to 300 MHz using an extendible digital platform that ensures level III+ accuracy. With fast Autotest times, powerful diagnostics, intuitive graphical interface and customizable solutions to support a wide range of testing needs.

- tifies Category 5, 5E, 6 and 7 cabling up yo 300 z Cat 6 compliance with the latest TIA/ISO/IEC dards
- ures a dynamic range of 100 dB to accurately sure the faintest signals
- ufacture-specific cable libraries are pre-installed quick recall
- es full graphical data for all measurments to re a quality installation and performance
- OMNIScanner 2 Includes: Scanner and Remote, LinkWare Software, Cat 6/5e Permanent Link adapters (2), Cat 6/5e Channel adapters (2), Ac Adapter/ Charger, Serial Cable, Soft Case, and Manual,
- Optional Accessories: Single-Mode and Multi-Mode Fiber Adapters, Universal Permanent Link adapters, Channnel adapters, COax Adapter, Office Locator Kit, 32MB Multimedia card and USB cable
- Optional OMNIFiber MM (62.5microm cables): Uses LED source @ 850nm and 1300 nm, measures loss and lengh up to 2000 meters (6560 ft.)
- Optional OMNIFiber SM: Uses Laser light source @ 1310nm and 1550 nm, measures loss and lengh up to 16,000 meters (52,480 ft.)

Fluke Networks Digital Cable Analyzers

The DSP Series of rugged digital cable analyzers are designed for cable installers and network owners who need to certify high-speed, copper and fiber cabling that fully complies with today's industry standards. These cable analyzers have an exclusive digital platform that ensures repeatable accuracy, no matter how many times you retest a link.

- Test a wide variety of LAN cabling systems
- Cable Types: Shielded and Unshielded Twisted Pair (STP,UTP), Foil-Screened Twisted Pair (ScTP), Coax, Fiber (optional fiber accessories)
- Test Standards: DSP-2000 TIA Cat 3, 4, and 5 Basic Link or Channel. DSP-4000/4300: TIA Cat 3, 4, 5, 5E and 6: 100ohm
- Supported Tests: Wire Map, Length, Propagation Delay, Delay Skew, Attenuation ACR, NEXT, NEXT@Remote, Power Sum NEXT, PSNET@Remote, DC Loop Resistance, Return Loss RL, (4000 only) ELFEXT.
- Display: Graphic bit-mapped LCD with Back light
- Memory: 2000/4000 1MB internal, 4300 16MB with Data Plot Storage Multimedia Card
- Dimensions: 2000 9"x5"x3", 4000 11"x5"x3" Weight: 3lbs.
- Languages Supported: English, Frensh, German, Spanish, Italian, Portuguese, Japanese, and Simplified Chinese
- Main Power: DSP-2000-NiCad, DSP-4000-NiMH battery with 10-12 hours of life
- Accessories: Fiber test adapters for Single and Multimode Fiber test accessories, Link interface adapters for Cat 5E, Lucent, AMP, Panduit, Ortronics, Krone, Alcatel, Hubbell, Nordx,and Siemen

Fluke Networks DSP Fiber Test Adapters

The Fiber Test Adapters add automated dual-fiber, dual-wavelength test and certification capability to the DSP-4000/4300, quickly transforming into a full-featured optical fiber tester. As high speed networks increasingly move towards optical fiber in premises and campus environments, Fluke is there to provide solutions to meet your fiber testing and certification needs.

- Test, certify and document fiber and copper with one tester
- Automatically test two fibers and two wavelengths simultaneously
- Singlemode, Multimode and Gigabit Testing
- Power Range: 0dBm to -50dBm
- Detector Type: InGaAs
- For use with DSP-4000 and DSP-4300 Cable Testers

Agilent Wirescope LAN Cable Analyzer

The Agilent 350 provides comprehensive support for all current emerging LAN certifications for both Copper and Fiber cabling. Full modular design allow for both software and hardware upgrades for future LAN standards beyond Cat 6/ Class E. Offering oustanding test performance, ease of use and powerful reporting tools. Testing solutions for LAN Cat 6, Multimode and Singlemode Fiber, and Gigabit Ethernet on Fiber & UTP.

- Supports LAN: Copper Cat 6, Single and Multimode Fiber (optional Smartprobes), and Coax TDR test probe (optional)
- Accuracy beyond TIA and ISO level III requirements traceable to laboratory reference standards
- Expanded test result storage on CompactFlash memory cards
- Easy to use color touch screen interface minimizes training requirements
- Memory: Standard Internal 4MB, 32MB CFlash (optional)
- Supported Tests: Near End Crosstalk (NEXT) and Far End (ELFEXT), Attenuations, Return Loss, Wire Map, Cable Lengths, Propagation Delay, and Loop Resistance
- Power: Rechargeable NiMH battery, 9 hours of operation
- Dimensions: 9" x 4.5" x 2.6" Weight: 2.6 lbs
- Options: Fiber Optic SmartProbes for Single and Multimode Fiber, Complete Fiber Test Kits, Coax Test Probes, 64MB CFlash card, Hard Case, Brady Lable printer interface cable, and Talkset Kit
- ScopeData Pro software: Organizes cable by site, building, floor, wiring closet, etc., to simplify recording navigation, provides professional quality detailed reports

Agilent Wirescope Fiber Optic Kits

Transforms the WireScope into a high performance optical fiber power and loss meter. Length and propa tion delay measurement capabilities are included in t single and multi-mode fiber SmartProbes modules. A data rates increase on LAN and WAN backbones, m imum feasible fiber transmission distances decreases is critical to verify compliance with the maximum len restrictions appropriate for the fiber type and netw topologies planned for any new or existing installatio

- Probe Kits for both Multi-mode 850/1300nm and Single-mode 1310/1550nm
- Measures fiber lengths up to 50Km for SMF and 4Km for MMF
- Network-specific pass/fail determination for 25 fiber interfaces, including Gigabit Ethernet (1000BaseSX and 1000BaseLX)
- Detector Dynamic Range for Single and Multi-mode: 0 to -40dBm
- Transmitter Power Output: Multi-mode -11dBm (850nm), -13.5dBm (1300nm): Single-mode -3dBm (1310/1550nm)
- Fiber Networks: Cable standards (TIA 568A,568B and ISO11801), Gigabit Ethernet, Legacy, ATM/ SONET, FDDI/Fibre Channel
- Propagation Delay Range: 0-300 micro seconds
- Dimensions: 2.4" x 1.6" x 0.8"
- Power: draws from wirescope 350
- WireScope 350 Pro Test Combo Kit (N2600A-150 Includes: WirescopeTest probes for MM and SM, ScopeData Software, batteries, AC adapter, Hard Case, USB cable, Calibration cable, 2-Way Talk set and CLA. (kit reflects a significant savings)

elephone Cable Tester

Local continuity tester for telephone and data cables with RJ11 and RJ45 modular plugs.

ts local patch cables

ts cables up to 1000ft (305 meters)
ntifies open, crossed and shorted connections
ts RJ11 DEC-MMJ connectors using adapter cou-
gs

- Identifies connector & cable pin-out using true cable mapping, not pairing
- Push-button operation
- Unshielded RJ45 modular-plug socket connection
- 9-volt battery included

Harris TS 22LO Test Sets

The TS22LO Test Set, offers built-in data detection with override features. The data lockout capability prevents the technician from inadvertently disrupting data when switch to talk mode, makes this unit state-of-the-art. When attempting to pull data tone from a very noisy imbalanced or noisy ground start line, the data lockout circuit can be overridden with the units override feature. The amplified speaker increases technician productivity.

- Data Lockout Protection with Override
- Amplified Speaker for Hands free Monitoring
- High Impedance DataSafe Mode
- DropSafe Reliability Passes 20FT. Drop Test
- RainSafe Protection in Server Weather
- Stores nine 18-Digit (speed dialing)
- PBX Pause Button
- Audible Ringer for Callbacks

Harris TS 45 ADSLSafe Test Set

The TS45S test set allows the user access to the POTS si of an ADSL line without downing the digital service. They also go into talk mode on the POTS side and place a call w out disrupting the ADSL data side. No other test set can offer this level of data protection, so it is perfect for ILEC and CLECs that are deploying ADSL service and having to deal with line share.

- ADSL Safe Technology will not down data service
- Data Lockout protects data service and emits warning tone
- Weatherproof Case and DropSafe
- Speed Dialing (ten 23-digit numbers)
- PBX Pause Button
- Rotary Dial and DTMF Outputs
- Speakerphone
- Twisted pair data services including: T1, E1, ISDN, PRI, BRI, HDSL, SW56, ADsl, and SDSL

njo Modular Adapter & Accessories

The Banjo Modular Adapters are designed to permit testing on lines. They allow circuit access without disrupting service. Sturdy copper contacts are angled to prevent alligator clips from falling off during testing. There are also small holes in each contact for use of test probes. The new Harris-Dracon Banjo Adapter has replaceable test leads and have a second jackfor pass-through operation. Replacement 4 wire, 6 wire, and 8 wire leads are available.

pToner Break-out Generators

The AT series tone generators make it simple to test any configuration of pairs in both 6 and 8 position modular jacks and plugs. By combining the features of the popular tone generators and a modular breakout adapter, the technician can now test continuity, polarity, send tone, and even supply talk battery to any pair, in any configuration. With both a modular plug and jack on each unit.

Telecom Cable Locators and Testers [550-15]

Harris Tone and Probe Kit

66661 66674 66682

The Pro2000 Tone Generator and Pro2000 Probe provide a system that works with all types of wire and cable, including twisted-pair, multi-conductor cable, electrical wire, speaker wire, coaxial, alarm cable and LAN cable. Packaged in a handy pouch, the kit includes the Pro2000 Tone Generator, Pro2000 Probe and ear piece.

• Pro2000 Probe: Inductive tracer identifies the singal from the genrator through drywall, wood, and other non-metallic materials
• Identify split pairs when one wire froma pari has been terminated
• Pro2000 Generator: offers an external switch to select solid and pulse tone options, indicates with sold or flashing LED
• Polarity LED indicates presence of voltage
• Gold plated to prevent corrosion build-up
• Ear Piece: for noisy environments, lightweight and easy to use

Fiber Optic Inspectors and Certifiers [750-30]

If you are purchasing these, you may need:

Consumables Kits . . . . . page 1542
Fiber Optic Installer Kits. . . . . page 1542

FLUKE Networks FiberInspector

The FiberInspector FT300 portable video microscope gives you superior vision by enabling you to inspect all types of installed fiber terminations in hardware devices and patch panels. The FiberInspector includes a hand-held LCD display unit and a small, lightweight probe that contains a long-life LED light source and CCD video camera. The probe adapter tip mates with the connector and projects crisp, clear images of microscopic debris and end-face damage on the LCD display. The video display allows you to look at a fiber end-face without looking into the fiber, eliminating any chance of harmful laser light reaching your eye.

- Easily inspects installed fiber connectors and cable assemblies on patch panels
- Magnification 250X with 2.5 in. TFT, active matrix LCD display
- Camera type CCD with adjustable focus and Video output NTSC
- Light source Red LED with Coaxial lighting technique
- Dimensions Display 3.5"x 2.3"x 8.5" Probe 1.3"x 1.3"x 4.3"

FLUKE Networks CertiFiber

Fluke Networks' CertiFiber is the industry's first hand-held tester for certification of multi-mode fiber networks. Makes certification fast with one-button CertiFiber measures fiber length and optical loss on two fibers at two wavelengths, computes the optical loss budget, compairs the results to the industry standards and provides and instant PASS or FAIL indication. Save then upload, manage and report results with free Scanlink Tools PC software.

459226

- Tests two multimode fibers at two wavelenghts in a single automated Autotest mode
- Optical Transmitter: LED 850/1300nm: minium power output -20dBm
- Receiver Accuracy: +/- 0.25 dB, Resolution: 0.01 dB/dBm
- Measurement Length: 2000 m (6560 ft.): Resolution: 1 m (3ft.)
- Dimensions: 3.1" x 7.1" x 1.6" (main & remote)
- Connections: Interchangeable adapters: ST (standard), SC, FC and universal
- Power: 6- AA Batteries

MEGGER Fiber Optic Light Sources

468032 449094 451099

- Features: Ruggedized waterproof housing IP54
- MLS635 Visible Light 635nm high intensity Class II laser source
- 9 Times brighter than conventional 670nm units
- Visual location of faults in patch panels, trays, etc.
- High stability output, Continuous and modulated outputs
- Battery powered 2 x AA Alkaline
- Ultra fast laser stabilization, High stability output
- Continuous and modulated outputs
- Includes: Carry Pouch

Tektronix Fiber Optic Sources

Fiber Optic sources for testing Multimode and Siglemode fibers. When us with an optical power meter, can detect loss in a cable caused by back con tors or damaged fiber. The TOP130 generates light at 850 or 1300 nm wav lengths (switch selectable)for multimode fiber. The TOP140 works at 1310 nm, and the TOP150 at 1550 nm for singlemode fiber. The TOP 130 uses a LED, TOP140 use a laser. All are poweredby a 9V alkaline battery.

66877

- Selectable output: CW or Modulated
- Modulation Frquencies: 270Hz, 1KHz, and 2KHz
- Univeral (SOC) interface

IKE Fiber Test Installer Kits

96140 434145 462162 462071

ether you require basic fiber link testing capabilities or more advanced documentation and rt generation, Fluke Networks FTK100 Basic Package and FTK200 Pro Package offers you rugged quality test tools to meet all your fiber testing needs.

Package FTK100: Includes FM130 Fiber Power r
0 Measuring Range: +6dBm to -50dBm

350/1300nm Infrared LED Source Output
r -20dB into 62.5 mircometer Multi-Mode fiber
Package FTK200: Includes FM150 Fiber Power r
0 Measuring Range: +6dBm to -50dBm

- FM150 stores up to 500 measurements for download to PC or serial printer
- Each Kit Includes: Hard-shell carrying case, Fiber reference guide, FTK200 (only) Data link Software
- Optional: Laser Source for Single-Mode Applications Model: LS1310/1550nm
- Optional: FT120 and FT140 Multi-Mode fiber viewer: 850nm (49mW), 1310nm (1000W), 1550nm (190W)
- FT120 (200X), FT140 (400X) Magnifcation, Fiber adapter 2.5mm universal ferrule for multi-mode or single-mode

Agilent Dual Laser Source

The N3974A Dual Laser Sourec guarantees ultra-high stability, even without warm-up period.

- Dual wavelength output with 6dB adjustments in 0.01dB steps
- Includes Connectors, Batteries, Carry strap, Pouch, Holster and Certification
- Dimensions: 7.9" x 5.4" x 2.9 ' Weight : 1.1 lbs
- Application Fiber Type: 9/125microm
- Power: 2 C cell, 140 hours of operation

Agilent Automated Optical Attenuator

The optical attenuator can be used in manual, relative, step and program mode. Program mode provides memory for 15 different presets for easy recall.

- Attenuation Range: 2.50dB to 60.00dB in 0.05dB increments
- Input Power <200mW, +23dBm
- Insertion Loss <2.5dB, Return Loss better than -40dB
- Battery operated: 2 C cells 200 to 600 hours
- Dimensions: 7.9" x 5.4" x 2.9" Weight 4.4 lbs
- Applicable Fiber Type: 9/125 micrometers

Agilent Mini-OTDR

The mini-OTDR is designed to provide its user with the fastest tool available for installing commissioing multiple fiber links and locating faults for fiber maintenance. Graphical representation of measurement results in event tables, showing loss and reflection, and pass/fail results.

- Long range measurements beyond 200Km (Ft, Miles or Km) with a 45 dB dynamic range
- Large Color 7.2 in. LCD Display
- One button operation gives fast, automatic measurement analysis
- Measurement storage: PCMCIA (16,000), 3.5" floppy drive and Internal SRAM (4000 points)
- Interfaces: RS-232, Centronics, and PS2 keyboard port
- Applications: Automatic Multi Fiber Test, Pass/Fail, Break Locator, Power/Loss mode, Visual Fault Finder, Return Loss, End-to-End Loss
- Dimensions: 7.7" x11.4" x 3.0" Weight: 6.4 lbs.
- Power: AC: 100-240 Vac 50-60Hz DC: 16-24V
- Optional: ToolKit II Plus software for post processing, analyzing, batch processing data, multiple trace transferring and a reporting package, Hard Carrying Case, PCMCIA card, and connector interfaces
- Field replaceable Modules REQUIRED selected by fiber type and wavelength required

ktronix NetTek OTDR Analyzer

tronix next generation optical installation and maintenance OTDR. The NetTek Analyzer is r configurable, scalable and field upgradeable. It can simultaneously support four different : modules, along with the PCMCIA-based OPM. Offers a color 10.4" touch screen. Intelli- ce Plus incorporates a patented multiple-pulse width acquisition with customer control of : speed and/ or resolution- a true one button automatic test. Automatic data analysis and ort generation combines results from the OTDR and OPM products into a single usable ort.

ures superior dynamic range and measuring eds, with out-of-band OOB capability at 1625nm elength

learnable and highly intutive windows-based UI esigned to train even unfamiliar OTDR users com Packages include: NetTek Analyzer, Color olay, Floppy Disk Drive, PC Analysis Software, Visual Fault Finder

- Power: 90-264 VAC 47-Hz, 20-28VDC
- Dimensions: 13" H x 9.8" W x 3.5" D Weight 9.3lbs.

Digital Ground Tester

The AEMC model 3640 digital ground tester is rugge easy to use, and designed to reject high levels of inter ference. Its large3 1/2 digit LCD and autoranging fea- ture simplifys operation of 2-and 3-point or fall-of- potential testing.

- Resistance Range: 10mOhm to 1999 Ohm
- Accuracy: 2% of reading
- Output Voltage: 128 Hz
- Output Current: 10 mA (variable)
- Battery Operated (AA)

gital Ground Resistance Tester

The AEMC model 4630 performs ground resistance (2- and 3-point) and soil resistivity (4-point) measurements. Autoranging meter measures between 0 and 2000 ohms.

- stance range: Auto-ranging 10m ohm to 1999 s
- racy: +/-2% of reading
- ut frequency: 128 Hz, Output current: 0.1, 1.0. 10m Amps
- Dimensions: 9.45" X 7.28" X 4.33"
- Rechargeable NiMH batteries, 120/230V 50/60Hz

Multi-ground resistance tester

The AEMC Clamp-on ground testers are ideal for testing multi-grounded systems without disconnecting the individual ground rods. Measures leakage current to 30 Arms, the Model 3731 adds memory and alarm functions.

- Resistance Range: Autoranging 0.01 to 1200 Ohms
- Accuracy: +/- 1.5%
- Output Frequency: 2403 Hz
- No Leads or rods required
- Direct Reading of continuity and ground loop resistance
- Direct reading of ground leakage or phase current from 1mA to 30 Arms

Low Voltage Insulation Tester

The BMM80 offers low voltage insulation resistance testing, combined with capacitance measurements which makes it fully suited to telecommunications applications. Includes a backlit display and a millivolt transducer input for a multiple of environmental and process measurements. The tester comes with a swit test probe to facilitate hands-free operation in tight applications.

- Insulation Mesaurements from 0.01 M ohm to 200 G ohms
- Voltage Ranges: 50, 100, 250, 500, 1000 Vdc
- Measures Insulation Resistance, Continuity, Voltage, and Resistance
- Capacitance Range 0.nF to 9.99 micro F
- Tranducer Input Range +/- 0.1 to +/-1999 mV
- Voltage Range 500 V dc/ac to 400Hz
- Continuity Range 0.01 ohms to 99.9 ohms
- Dimensions: 1.77" H x 8.66" W x 4.33" D Weight 1.63 lbs.
- Power: 6 x 1.5 V alkaline cells

Telecom Megohmmeters

429080 488095 438009 424003

The models 1035 and 1039 are low vol age insulation testers designed for both field and shop use use. They are ideal f measuring the insulation qualities of pho and data cables. Applications include Tel com insulation resistance at low voltage (50,100V), line to line imbalance, line to line capacitance, off hook detection, cab capacitance and cable length.

- Test Voltage: 50, 100V (1039) 50, 100, 250, and 500V (1035)
- Insulation Resistance Range: 20,000M ohms (1035), and 400M ohms (1039)
- Digital display with bargraph and backlight
- Additional Measurements 1039 only: AC voltage 400Vac, Capacitance 4,000nF, Cable length 35,000 ft.
- Alarm Set point
- Dimensions: 8.31"L x 4.26" H x 2.36" W
- Power 6 x 1.5V AA Weight: 29 oz.

ulation & Continuity Tester

The Biddle BM81/2 is the perfered insulation and continuity tester for ISDN testing, ensuring the reliablity of twisted-pair telephone lines used for high speed communications. The BM81/2 offers test voltages of 50, 100, 250, & 500 V for tip-to-ring, tip-to-ground and ring-to-ground measurements on twisted pair copper wires. This allows precise resistance readings on sensitive equipmant that operates on lower voltages.

- ation Measurements to 100 G ohms
- ge test ranges: 50, 100, 250, 500 Vdc
- al Communications tests include noise, opens, ts, grounds, and crosses
- ures 600 Vdc and 450 VAC
- Battery Condition Test

High Resistance Megohmmeter

The AEMC 1060 has been designed to facilitate testing and incorporates user friendly and intuitive functions. Measurements are displayed on a large LCD containing a bargraph with a digital display for resistance readings and a smaller display for actual test voltage at the sample, test time, and alarm set points. The 1060 has an RS-232 interface with internal memory function, which allows the storing of results for downloading or direct printing through a serial or parallel interface.

- Features Include:
- Test Voltages: 50, 100, 250, 500, and 1000 VDC
- Resistance range: 50V @ 2K to 200 G ohms and 1000V @ 40K to 4000G ohms
- Automatic DAR, PI, and Capacitance measurements
- Displays Resistance, Test Voltage, and Run Time
- Internal Memory 128K for extensive field recording of results
- Power: Rechargeable NiMH battery and 85-256VAC 50/60Hz
- Dimensions: 9.45" H x 7.28" W x 4.33" D Weight 7.5lbs.

Megger Insulation Resistance Tester

These Meggers are designed for convenience and ease-of-use when testing complex or large electrical installations, and commissioning, servicing or maintaining electrical equipment. Applications include safe testing of motors, generators, cables, switchgear, transformers, distribution networks, components and appliances. Aircraft and tele-communications equipment can be tested at the relatively low 100Vdc and 120Vac systems.

- Insulation Resistance range: 0.1M ohm to 2000 M ohms
- Accuracy: +/-1.25% FS with 2.8" arc length
- Resistance range: 0.1 to 5000 ohms
- Power: 212159 Handcrank, 212559 120Vac and rechargeable battery

High-Pot Testers

The Biddle AC and AC/DC High-Pot Testers are designed for safety and ease of operation, they readily adapt to development, maintenance or rapid production line testing to the latest UL standards. Applications include UL 1270 Radio Receivers, Audio Systems, Accessories, motor, electirc and medical equipment.

- Applied Test Voltages 3KV AC and 4KV AC/5KV DC
- Adjustable Leakage Current Trip Levels: AC 0.3 to 12mA DC 0.43 to 17mA
- Voltage Control Safety Interlock requires control to be reset before re-energizing
- Failure Lamp with buzzer, output trips off
- Power: 120Vac +/- 10% 50/60 Hz
- Dimensions: 8.0" H x 9.0" W x 8.4" D Weight 13 lbs.

Digital AC Loop Tester

The MEGGER LT7 Digital Loop Tester is a small hand held instrument designed to accurately, reliably and easily measure Loop Resistances and Prospective Fault Currents at socket outlets, distribution boards and light sockets. The LT7 may also be used for testing earth bonding. Two Loop Tests are available; a traditional high current test for circuits protected by fuses, and a low current test for taking measurements on circuits which are protected by Residual Current Devices (RCD's).

- Loop Impedance Ranges 0.01 ohm to 19.9 ohm
- Short Circuit Current Ranges .01 to 19.99 kA
- Tests Phase-Earth and Phase-Neutral supply loops
- Direct Readout of Prospective Short Circuit and Earth Fault Current
- 110/230VAC

Power Quality Analyzer

The Fluke 43B Power Quality Analyzer performs the measurements you need to maintain and troubleshoot power distribution systems and diagnose equipment failures. The Analyzer performs measurements to record Harmonic Distortion (THD), Watts, Power Factor, VA, and VAR, Voltage, Current, Resistance and Capacitance. The perfect analyzer for your power quality demands.

- THD Total Harmonic Distortion from the 1st to the 51st harmonic 51st Harmonic
- Continuously measures volt and amps on a cycle-by-cycle basis for upto 16 days
- Catch voltage transients and waveform distortion
- Saves upto 40 transient events
- FlukeView PC software log harmonics and readings over time
- Measures duty cycle, phase, pulse width, and crest factor
- Voltage - 5.000V to 1250V RMS (AC/DC)
- Amps - 50.00 to 50.00K Amps RMS
- Power - 250W to 2.5M Watts
- Transient Capture 40ns pulse width
- Save/Recall 20 measurement screens
- Includes: Hard case, Test lead Kit, 500A AC clamp, RS-232 interface with FlukeView Software, rechargeable batteries and charger

Low Resistance Ohmmeter

The MEGGER DUCTOR DLRO 10 Low Resistance Ohmmeter is designed rigors of on-site testing and laboratory use. Automatically selects the highest current, up to 10 Amps dc, to measure resistance ranges from 0.1 micro-ohms to 2000 ohms on seven ranges. Operates in normal, continuous, and high power mode. Applications include switch and contact breaker resistance, busbar and cable joints, frame bonds, static control circuits, welding joints, intercell strap connections on battery systems, winding resistance, rail and pipe bonds, wire and cable resistance and many more.

- Accurate results in under 3 seconds
- Automatically detects continuity in potential and current connections
- Visible warning of high voltages present at the terminals
- Measuring ranges from: 1.9999mohms @ 10Amps to 1.999 ohms @ 100 micro-amps
- Accuracy: +/- 0.2%, +/- 2 counts
- Power: NiMH battery, life 1000 x 10 amp tests, charger 115/230 VAC 50/60 Hz
- Dimensions: 8.6" H x 4" D x 9.5" W Weight: 5.6 lbs.

TECHNOLOGIES®

30-Day Risk-Free Purchasing

Try TESSCO's risk-free purchasing program, designed to give you the opportunity to explore new products without risk.

If for any reason, you are unhappy with a purchase, you may return it within 30 days of receipt. TESSCO will give you a money-back refund or full credit toward another purchase.

TESSCO's 30-day return policy extends to all items except special order or value-added items, which are eligible only if defective.

Qualifying for the risk-free purchasing benefit is easy:

1. Return all items within 30 days after receipt.

2. Return all items in original condition and packaging, freight prepaid.

3. Enclose a return form (found on the back of your packing list) with all items.

After following these three simple steps, TESSCO will award you a refund or full credit toward a future purchase.

Take advantage of TESSCO's 30-day risk-free purchasing today and explore new products with confidence.

TESSCO
TECHNOLOGIES®

Financing Solutions Go Way Beyond Open Terms

TESSCO's financing is collaborative, flexible and specific to your unique business needs. We're committed to providing timely and sufficient financing to minimize interruption in flow of products and services to you!

Open Terms

Our credit-granting process is simple and timely!

NEW!
TESSCO Extended Payment Terms

Take advantage of your good credit history to leverage your short-term financing needs.

- Available terms of 3, 6, 9 or 12 months
- Low fixed-interest rates
- Ability to budget fixed monthly payments
- Keeps existing lines of credit free
- Quick turnaround time

Joint Purchase Order Program

Increase your business credit capacity by leveraging your customer's credit-worthiness to secure a higher credit line for bigger purchases. Your customer issues a joint purchase order to both you and TESSCO, using TESSCO's remittance address. Your customer pays TESSCO directly, and you will be reimbursed within 24 hours. Your margin and your customer relationship are protected.

TESSCO® Platinum MasterCard

Receive deferred billing on all TESSCO purchases charged to your TESSCO® Platinum MasterCard. To learn more about many great benefits, click on **www.tessco.com/account/credit/mastercard** and mail your completed application to Business Lending Processing Center, PO Box 15973, Wilmington, DE 19885-5973.

Equipment Leasing Program

Balancing your company's cash flow can be a lot easier through leasing. Get financial flexibility and conserve bank lines for working capital, really important now for small- and medium-sized businesses. TESSCO offers a full range of leasing

options with fast turnaround time, easy documentation, competitive rates, and affordable monthly payments! Contact **410-229-1176** or **leasing@tessco.com.**

Dealer & Reseller Financing

- End-of-the-month invoicing
- Escrow agreement for major deals
- Net 60 PO financing for special projects
- Third-party financing...it's your deal, but we take the credit risk, invoice your customer, and collect.
- Third-party leasing for reseller's customers

Enhanced Credit Capacity

Grow your business with the help of your personal credit. If your business is new and your business credit is not yet established, TESSCO will extend credit to your business through your personal guarantee.

3-Payment Plan, No Interest for 90 Days

Purchase equipment with three equal payments with the TESSCO® Platinum MasterCard.

Rental

TESSCO has broad offerings of test equipment available for established customers to satisfy short-term equipment needs.

EFT (Electronic Fund Transfer)

Simply provide pertinent bank information and your transaction will be processed by fast, efficient and secure electronic payment. You can also initiate EFT by completing our brief online form.

Bank Letter Of Credit

A letter of credit from a financial institution is accepted for purchases with special conditions agreed to by all parties.

Credit Card

TESSCO accepts credit cards, including American Express, Discover Card, MasterCard, and Visa.

Contact our financing experts at ct@tessco.com or call 410-229-1395

Agilent Technologies

Technologies that accelerate your progress

ESA Spectrum Analyzers

TESSCO Part No. 73951

The ESA spectrum analyzers, available in 5 frequency ranges are designed for scalable performance. Built in power measurements and 8 optional application focused solutions in a portable frame make it suitable for the field service environment. Resolution to 1Hz, wide dynamic range and a snap on rechargable battery are three of over 40 optional features available at an economical price.

53140 Series Microwave Counter/ Power Meter/DVM

TESSCO Part No. 423163

The Agilent 53140 Series is a full-featured CW microwave counter, a true power meter, and a dc DVM all-in-one, small, convenient package. It is the ideal tool for installation and maintenance of point-to-point microwave links as three of the most commonly made field measurements are combined into one instrument.

EPM-P Series Power Meters

TESSCO Part No. 91509

The EPM-P series power meters measure peak, peak-to-average ratio and average power of complex digital modulation formats (GSM, EDGE, NADC, iDEN, Bluetooth, CdmaOne, W-CDMA and cdma 2000), and also provide time-gated measurements. Six new power sensors are available in frequency ranges of 50 MHz to 6 or 18 GHz and in 300 kHz, 1.5 MHz and 5 MHz bandwidths. Also compatible with the Agilent 8480 and E-series power sensors.

E6392B GSM (GPRS) and E6393A/B CDMA/PCS/ AMPS Mobile Station Test Sets

TESSCO Part No. 483171

The Agilent E6392B GSM (GPRS) and the E6393A/B mobile station test sets provide mobile station screening and repair diagnostic functions for service technicians and operators of network equipment manufacturers and service providers. The E6392B tests all GSM formats, and, with the new GPRS options, E6392B now tests and troubleshoots GPRS-enabled mobile stations. The E6393A/B tests all major CDMA formats.

8712 Series RF Network Analyzers

TESSCO Part No. 96179, p. 0000

The Agilent 8712 family of RF economy network analyzers provide speed, accuracy and automation features in a compact, integrated instrument for RF component manufacturing, inspection and maintenance. Choice of 50- or 75-ohm instrument with frequency coverage from 300 KHz to 3 GHz and a built-in T/R or S-parameter test set.

Willtek Mobile Phone Fault Finder

The Willtek (formally Acterna/Wavetek) mobile phone testers enable shops and service centers to identify faulty and no-fault-found mobiles in just a few seconds. Allowing users with minimal skills to achieve a simple PASS/FAIL decision on a handset. The 4107 minimize the resources needed to resolve a customer's complaint, ensuring fast turnaround. Provides improved RF power accuracy <1dB. Designed for the service centers, features intuitive operation and AUTOTEST to minimize training required.

- Supports GSM 900/1800/1900, dual-band and triple-band, key measurements:
- Key measurements: Rx level and qual, Asynchronous mode, MS power, BER/FER, MS sensitivity, phase and frequency error, burst shape and length and burst edge failure indicator
- Power: 100 to 250VAC 50 to 60 Hz
- Dimensions: 10.0" X 4.4" X 3.8" Weight: 3.4 lbs.
- Includes: Operating Manual, Test SIM, Power Supply, and RF connecting cable

PCS/GSM Portable Phone Tester

Handset service occurs at three level: In-store go/no-go testing, mid-level board and module swaps at a depot, and high-level component replacement, also at a depot. The 4201S delivers fast, accurate, and cost-effective RF and functional test for mid-level service. Automated measurement of all relevant GSM parameters and specifications. Tests and limits can be modified as needed. Modern GSM phone can be checked with audio assesment of EFR codec, fax and data tests together with SMS. Includes a spectrum analyzer. AUTOTEST mode provides a quick checkout of a mobile. In FAULT-FIND mode, manual control simplifies troubleshooting. RS-232 for remote control and data retrieval. Web download preserves investment by simplifying updates. Operates on 94-264 VAC. Includes: Test SIM, Power supply, RF Connecting cable and Manual.

Willtek GSM Mobile Phone Tester

The Willtek (formally Wavetek/Acterna) mid-level service tester performing board swaps, module exchanges and subsequent RF alignment. Offers built-in AUTOTEST for routine pass/fail test for simple and easy of testing. Manual or Fault Find mode operate in Asynchronous mode allowing you to get the phone on a traffic channel to perform RF testing, the Asynchronous mode allows the phone to be controlled by manufactures software to align mobile phones. The Data mode for modems that do not support standard traffic channels but only data channels for RF testing.

- Test and alignment in service shops and depots
- Standard GSM testing, Service/Asynchronous mode, Triple Band and SMS/Data channel testing
- RF Generator/Analysis: GSM900, E-GSM, GSM-R, GSM 1800/1900 and 850 (optional)
- Connections: RF input/output N female, External ref. BNC female
- Power; 100 to 250 VAC, 50/60Hz
- Dimensions: 12.2" x 6.7" x 6.5" Weight 5.5 lbs.
- Includes: Test SIM card, RF connection cable, centronics, RS-232-C, power cable and manual
- Optional: GSM 850, AM Signal Generator; De-Tuning, Utility Software and RF shield boxes (sku39444)

Willtek CDMA, TDMA, AMPS, NAMPS Analyzer

Standard Features: For AMPS, NAMPS, CDMA, cdma2000/1xRTT and TDMA systems. Floppy disk drive for field upgrades, data storage. Stores 5 user custom test programs. GPIB IEEE 488 Interface & RS-232-C. Motorola Audio output. "C message weighted" filter. 50 & 300 Hz high-pass filters. 3 KHz, 15 KHZ, 30 KHZ low-pass filters. Cable loss calibrator eliminates errors caused by RF test cables. Manufacturer's specification tables built-in. External reference frequency input. Spots marginal phones. Includes SINAD, deviation, frequency, SAT, and ST meters. Also reads ESN, SCM, and MIN. Two programmable keys for user-set "Quick Tests." Mobile power jack powers the phone and measures current draw.

- Features QuickTest mode provides Go/No/Go, AutoTest provides intensive testing
- Manual User control mode: Simulate Real Network Conditions to Measure and align mobile phone accordingly
- Data management results can be printed, stored or managed with free Software upgrade via the Internet
- Power: 85V to 264 VAC, 47 to 440 Hz
- Dimensions: 7" x 19.5" x 16.5", Weight: 37 lbs.
- OPTIONS: VCELP Voice codec Software (IACELP-OPT), IS-136 custom software (for 4304, 4305). OSCI Oven-controlled oscillator (0.05 ppm), and Screen capture Software (ISCRNCAP).
- Includes: TNC cable, Adapters, Printer cable, RS-232 cable, and Power cord.

gilent GSM (GPRS) Mobile Station Tester

gilent Technologies provides a solution designed for the changing mobile-phone repair envi-nment. The E6392B GSM (GPRS) provides mobile station screening and repair diagnostic nctions for service technicians and operators of network equipment, manufacturers and ser-e providers.

- bile Station Test Solution for: GSM900, CS1800, and PCS1900 Mobile-phones, from spection to module-level repair and after calibra-n testing
- ndard Comprehensive Testing for: RF spectrum alysis and signal generation, transmit peak power, wer ramp, phase and frequency errors, dc cur-nt, and includes a built-in DC power supply tions: Asychronous Test (In-band spectrum easurement), DC Power Adaper, Test SIM and cro SIM cards, RF signal generator
- Optional PoST Software: Provides the following tests based on the industry standards for GSM tech-nology: mobile Rx reports, peak power, phase error, power vs. time, Type II BER and FER, burst timing error, current drain, and echo loopback
- Dimensions: 13.77" x 5.9" x 13.77" Weight: 22.8 lbs.
- Power: 90 to 264 VAC, 47Hz to 63Hz

Agilent CDMA/PCS Mobile Station Tester

- Complete coverage of worldwide CDMA and AMPS cellular and PCS formats, including cdma2000 1x
- Key measusements include: call tests, power, frequency, and single code rho, multi code rho and TDSO FER measurements
- Consistent, reliable test results to a manufacturing test solution, with +/- 0.6 dB signal level and power measurement accuracy
- Comprehensive troubleshooting tools, including built-in automatic testing over 9 channels, CDMA/AMPS handoff test, optional programmable 12Vdc source, and signal generator
- Optional PoST Software:Includes CDMA waveform quality and frequency accuracy, softer handoff, CDMA traffic channel open loop power, Digital to analog handoff, Analog Tx RF power output, Tri-mode phone testing, Signaling Tone/DST, and Analog SINAD
- Dimensions: 13.77" x 5.9" x 15.75" Weight: 34 lbs.
- Accessories: Antenna coupler, SRAM card, RF Cables for Nokia 51xx, 61xx, and 71xx phones

Willtek Universal Antenna Coupler

The Wavetek Universal Antenna Coupler can be used to connect any mobile phone to test equipment quickly and reliably. No need for individual cable connections for each phone. Simply place the mobile phone on the Universal Antenna Coupler, connect to test equipment, and test. Works for all Cellular, PCS, and GSM phones. Provides direct connection to Wavetek 4100 series testers. This unit can also be used with any tester, but adapter sku 89453 must be used to connect.

Cellular Testers [710-10]

Acterna MMF-4350 Mobile Fault Finder

The MMF-4350 is a series of testers for point-of-sales (POS) and filter service requirements, providing fast g no-go decisions. You can see within seconds whether the phone is operating correctly. Depending on the model, you can test AMPS, NAMPS, CDMA, TDMA, and PCS-1900 phones. All necessary parameters and functions of the mobile phone are checked by simulating real conditions. The results can be printed and handed to the customer. *Order Wavetek Phone Specific RF Adapters Separately.

IFR COM120C Service Monitor

472324

The COM-120C has been recognized as an Industry standard in Communication Service Monitors. The "C" version of this popular model adds a color display and a tracking generator to the list of standard features combined into this service monitor. The COM-120C combines over 20 instruments into one unit, offering a cost effective solution to your test set needs.

- Includes: Manual, AC & DC power Cords, Fuses, Telescoping Antenna, TNC/M to BNC/F & Right Angle BNC Adapter.
- Standard Features:
- Color Display
- Tracking Generator
- Split Screen Spectrum Analyzer
- RF Power and Level Meter: 2mW-200W
- RF Frequency Counter and Error Meter
- FM and PM Deviation Meter
- Amplitude Modulation Meter
- RF Generator Output 1 GHz/+13dbm
- AF Generator Output 20 kHz/2.5vpk (150 ohm)
- Distortion and Sinad Meters
- Oscilloscope and DVM
- Audio Frequncy Counter
- Frequency Range: 250 KHz to 1 GHz
- Receiver Sensitivity: 2uv
- Internal Memory and PCMIA Slot
- Weight: 38.5 lbs. (w/o options,lids,etc.)
- Dimensions: 15.75" X 7.5" X 16.875"

Agilent 8920B

482171

The Agilent Technologies 8920B is a full-function test set based upon the Agilent 8920A design but with increased measurement speed, accuracy, and larger user memory (928 kbytes standard). The 8920B uses PCMCIA memory cards for data storage and radio test programs. The 8920B has the functionality, speed, and accuracy for testing land mobile radios, cellular telephones, and other communications systems while improving throughput and quality in manufacturing.

- 400kHz to 1GHz
- RF/AF signal generators
- AM/FM modulation analyzer
- RF/AF power meter
- Spectrum Analyzer
- Tracking Generator
- Adjacent channel power meter
- Oscilloscope
- IBASIC controller
- Signaling encoder/decoder
- Function generator
- AC/DC voltmeter
- SINAD/SNR meters
- High Stability reference
- Radio Test Software Options: AMPS/EAMPS/NAMPS cellular phone tests
- TACS/ETACS cellular phone tests
- External TDMA cellular adapter(IS-54,IS-136)

Pager Test Equipment [730-10]

Advanced LCD Bonding System

The ABS-3000 Beyond-O-Bonder provides high-quality pager LCD bonds at an affordable price. The unit does not require a silicon pad or other heat shield as it's heater has a teflon sleeve. A 200 watt heater holds the brass head to a uniform temperature across the entire width to ensure an even, tight bond. The bonder comes to the set temperature in 2 minutes for the low setting (360 F), and 4 minutes for the high setting (460 F). Custom fit pager plates hold the pager in the correct position for a clean bond. Plates are sold separately or are available in packages. Purchase the bonder with 12 plates and get the best deal.

RF Screen Room Kit

RAMSEY

A screen room is the ultimate shielded enclosure, it allows the user to work without RF interference. It's large size (7'x7'x7') gives the user enough room for a workbench and test equipment.

- Includes
- 200ft of 48" Aluminum Screen
- 50ft of 6" Aluminum Flashing
- Two 10 1/2"x15 1/2" Aluminum Plates
- One AC Line Entry Filter (15 amp)
- One AC Line Cord

Triplett RF Isolation Box

This portable box eliminates the need for expensive isolation rooms while providing the necessary isolat to test cellular phones & pagers. With an isolation o 80dB, the box prevents transceivers and receivers fr locking on to nearby sites giving you control of the phone & pager. The box has internal incandescent lig ing so you view the unit under test. The joystick allo you to actuate the units buttons & switches. Baseba connectors are providedfor injecting and measuring baseband signals, as well as power. FREQUENCY RANGE: 144MHz - 2.0GHz. ISOLATION : 80dB. RF Connector: TNC-F. Baseband Connectors: 2 BNC-F; Banana jacks. POWER: 120VAC SIZE: 14"x14"x8.75" Weight: 27lbs

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
42597 1 EACH	Triplett T3246 1 yr	Portable screening room. Includes: AC power pack,baseband connector box, antenna, and instruction manual.	2,600.00 27 12.27	2,600. 2,574. 2,548.

Radiation Test Fixture

The radiation test fixture is designed for use as an aid testing and aligning pagers. Mechanically, the RTF-1 holds the pager in the servicing position & provides t means for hands-free connection of the contact pins the pager under test. Electrically, the RTF-1 allows m surements of radiated sensitivity,frequency, & SINAD when used in conjunction with the appropriate test equipment. Three built-in BNC connectors allow co nection to RF signal generator,service monitors, SINA meters, frequency counters, etc. Internal strip-line design ensure flat, calibrated frequency response wit out the need to remember external attenuator pads terminations.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
95228 1 EACH	Ramsey Electronics RTF-2 1 yr	RF Radiation Test Fixture with receive with built in antenna for checking the IF and operating frequency without opening pager case.	515.00 4.1 1.86	515.0 515.0 512.4

Quick-Page Paging Encoder

The PE-6400 "Quick-Page" Paging Encoder is compat ble with ALL currently available paging formats, such FLEX, POCSAG, Golay, 2 tone, and 5/6 tone formats. Single key format and speed selection. Bright 2 line b 20 character display shows format, speed, capcode a message all at once. Seven preprogrammed messages including numeric strings, tone only, and preamble. Three user-progammable messages in non-volatile memory. Capcode increment/decrement and edit key 600 ohm outputs. EASY-TO-USE isan understatement

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Handheld Oscilloscopes [680-13]

If you are purchasing these, you may need:

Tool Kits, Complete . . . . . page 1523
Equipment Protection Cases . . . . . page 1537

TekScope Series

58689 16786

The TekScope represents a new benchmark in high performance, previously unavailable in handheld scopes.

- Oscillosope Features:
- Dual Channel
- 2500 point record length
- Horizontal and Vertical Cursors
- Autorange in volts/div, time/div, trigger level
- Automated Measurements
- Multimeter Features:
- 3-3/4 Digits
- 4000 Counts
- DC/AC volts from 4V to 1000V
- Resistance with Continuity Beeper
- True RMS
- Min/Max Alarms
- General Features:
- Non-Volatile storage for 10 waveforms
- 10 Setups
- 10 DMM screens
- RS232 Interface
- Battery and AC charger included

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
58689 1 EACH	Tektronix THS720P 3 yr	100MHz O'scope, DMM and Power Meter. Measures harmonics,real & apparentpower. Motor trigger. RS-232 interface. FREE A621 Current probe. Bright white display. Rechargeable battery.	3,495.00 11 5	3,477.53 3,460.05 3,425.10
82856 1 EACH	Tektronix THS720A 3 yr	100MHz, 500 mega sample digital real time scope with external trigger, enhanced video trigger and more powerful DMM.	3,295.00 10.28 4.67	3,278.53 3,262.05 3,229.10
16786 1 EACH	Tektronix THS730A 3 yr	200MHz, 500 mega sample digital real time scope with external trigger, enhanced video trigger and more powerful DMM.	3,695.00 5.94 2.7	3,676.53 3,658.05 3,621.10
47480 1 EACH	Tektronix THS730A3B 3 Years	200MHz, 500 mega sample digital real time scope with external trigger, enhanced video trigger and more powerful DMM. Includes the Accessory Pack option.	3,930.00 8 3.64	3,910.35 3,890.70 3,851.40

Fluke 190 Series ScopeMeters

59197

Fluke 190 Scopemeter, A DMM combined with an Oscilloscope for waveform analysis.

- Vertical Control: 5 mV/div to 100 V/div
- 3-2/3 digit 5000 count True RMS DMM
- Trend Plot Recorder
- Full screen width waveform in scope and meter mode
- Measurement Menus
- Continuous Auto-set
- High contrast backlit LCD screen
- 24 Automatic waveform measurements
- 10 Scope memories of two waveforms and setup
- Recorder mode captures 100 screens
- 100x zoom
- 1000 V isolated inputs
- NiMH battery powered with AC adapter/charger
- Includes battery, charger, two probes and probe accessories

Fluke Color Scopemeter 190C Series

444189 467180

The New ScopeMeter 190C series with large, high-resolution, co screen and new Digital Persistence mode gives you an even bette view of complex waveforms in the most demanding troubleshoot applications in the field. Fast display update rate for seeing dynam behavior instantaneously, Stop-on-Trigger in ScopeRecord mode storing and analyzing pre-trigger waveform data. Automatic captu and replay of last 100 screens.

- Dual Input Color Oscilloscope with full function true RMS DMM
- Bandwidths: 100MHz and 200MHz
- Waveform Mathematics, and ScopeRecord (27,000 points) modes
- Automatic capture of 100 screens for manual or continuous replay
- Full DMM functions: 5000 counts, VDC, VAC, Ohms, Continuity, Diode test, Amps (AC & DC)
- Display: Bright LCD with CCFL backlight (4.5" x 3.4")
- Dimensions: 10.1" x 6.6" x 2.5", weight: 4.3 lbs.
- Power: line power 120VAC, Battery NiMH 4 hour life and charge time
- Options: FlukeView Software with cable (SCC-190 AC/DC current probes, Temperature probe, Hard and Soft carry case, Test leads.

ScopeMeter 123

15660 84029

- 20 MHz bandwidth
- 25 Megasamples/sec
- 1.25 Gigasample/s repetitive
- 5 mV/div to 500 V.div
- Superior triggering with 7modes + Video
- 10 direct measurement functions
- 2 screen and 10 setup user memories
- Dual input 5000 Count Autoranging DMM
- 500 mV to 1250V True RMS
- Measures both AC and DC concurrently
- Diode Test
- dBv, dBm, Crest Factor, Ohms, Continuity
- 16 day trendplot records data
- Battery and AC adapter included
- Optional PM 8919 required for full 20 Mhz "connec and View" hands off operation

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Equipment Protection Cases. . . . . page 1537

Tektronix TDS3000B 100MHz to 500MHz DPO

DPO Technology provides a new level of insight into complex signals. DPOs' display, store and analyze in real-time three dimensions of signal information: amplitude, time and distribution of amplitude over time. Fast waveform capture and update rates make it easier to capture and display infrequent waveforms or waveform variations. The intensity graded color display provides information about the frequency of occurence of signal amplitude and widths. This helps you locate and characterize waveform anomalies that can be elusive on traditional digital storage oscilloscopes. WaveAlert enhanced troubleshooting ability to detect waveform anomaly, and monitor incoming signals on all channels and will detect and highlight any waveform that deviates form the normal waveform being acquired.

- Full Color VGA LCD Display, QuickMenu Graphical User Interface (GUI)
- Applications: Telecommunications manufacturing and field testing (for PABX systems, Telephone/data switches, cellular phones, cable TV/satellite receivers and modems), Digital Design and Debug, Video Installation and Service, Power Supply Design
- Standard Features: Floppy Disk Drive, FFT Fast Fourier Transfer, Advance Triggering (Pattern, State, Pulse Width, Runt, and Slew Rate) Built-in Ethernet, and Centronics Port, WaveAlert
- Optional Application Modules:
- TDS3TMT: Telecom Mask Testing (Pass/Fail test for Telecommunications compliance Testing)
- TDS3AAM: Advanced Analysis Module define wavefroms as arbitray math expressions, advanced mathematical functions, Area and Cycle Area differentiation and intergration functions
- TDSPRT: Portable document capability, plugs directly into the back ofthe TDS3000/B for hard copy screen prints
- Options: Soft Case, High Voltage Probes, WaveStare Software (48829), Voice Link, Rackmount Kit, and Fast Battery Charger
- Dimensions: 14.8" x 6.9" x 5.9" Weight: 7 lbs.
- Power: 115Vac, 60Hz Optional NiCad Battery Pack
- Each unit Includes: Manual, Reference guide, CD, FFT, TRG, front cover, accessory tray, power cord, Certification of calibration

Tektronix TDS5000 1GHz DPO

The TDS5000 Series DPO delivers up to 1 GHZ bandwidth, 5 GS/s real-time sample rate, 8 MB record length (optional) and 100,000 wavefrom capture rate. This perfromance, along with an industry-leading suite of advanced triggers, intuitive user interface, and an open Microsoft Window platform, all in a compact bench-top package. The large 10.4" display and extensive use of intuitive icons create a highly visual environment with explicit illustration of instrument features.

- Features: 500 MHz and 1 GHz Bandwiths
- Open Microsoft Windows Architecture delivers Built-in Connectivity
- Fast Ethernet connections to printers, Internet, external PCs and othe LAN devices
- Triggers: Video and Window, Logic Runt, Edge, Width, Pattern, Glitch, Transition, State, Timeout and Setup/Hold Triggers
- Applications: Spectral Analysis, Power Measurements advanced math and math-on-math, Jitter and Timing Anlysis, Transient Phenomena, Video Design and Debug, DVD Analysis
- Standard Features Include: CPU (800 MHz), Hard Disk Drive (10MB), CD-ROM, Analog Style knobs, for each channel, Graphical Pull down menus, Parallel, Audio, USB, Keyboard, Mouse, LAN (RJ45), Serial, SVGA, GPIB and VGA Ports
- Options Include: CD-RW Drive, Touch-screen interface, Built-in thermal printer, 8MB sample rate,

ilent Synthesized Signal Generator

The Agilent Synthesized RF Signal Generator is ideal for manufacturing high volume products such as cordless telephones, pagers, and two-way radios. Designed for semi-automated receiver test, and a variety of general purpose applications. Built to stringent quality standards, promoting reliability and measurement repeatability. The simplistic design of the front panel shortens the operator's learning curve and increases productivity.

- uency Range:from 9kHz to 4000 MHz, depend- on model
- uracy: +/- 3 x 10-6 X carrier frequency (Hz)
- ility: +/-2 ppm/yr
- monics: LT -30 dBc
- plitude Range:+10 to -136 dBm
- plitude Resolution: 0.1 db
- plitude Accuracy: +/- 1.5db
- Superior Level Accuracy
- FM Internal rates: 400 Hz to 1 kHz
- FM External DC Rates: DC to 75 kHz
- FM External AC Rates:1 Hz to 75 kHz
- Wide frequency and output coverage
- Remote and memory interfaces
- Electronic Attenuator

alog RF Signal Generator

Agilent Analog RF Signal Generator offers excellent performance with superior quality and ility. It provides excellent frequency and level control and wide analog modulation capabil- It is ideally suited to meet the demanding requirements of today's receiver test, compo- test, and local oscillator applications. Designed for long-term dependability, which mizes productivity, throughput and uptime.

- ency Range: 250 kHz to 4 GHz, depending on el
- ty: +/-1 ppm/yr
- onics:LT -30 dBc
- aximum Deviation: 10 MHz to 40 MHz, nding on model
- ates-FM1: DC to 10 MHz
- ates-FM2: DC to 1 MHz (typical)
- AM Range: 0 to 100%
- AM Resolution:0.1 %
- Output Power:-136dBm to +13dBm
- Built in function generator, generate sine,square,ramp,triangle,pulse and noise
- Electronic attenuator increases accuracy and repeatability

Agilent Function Waveform Generators

447122

The 33120A and 33250A offers a compliment of standard functions, with arbitrary waveforms, 12 bit resolution 40 MS/s sample rate (33120A) or 200 MS/s (33250A). In addition the 33250A can generate pulse waveforms up to 50 MHz with variable edge time. Built-in modulation capabilities and both linear and log sweeps. External clock reference timebase increases frequency stability while generating phase-offset signals.

Handheld Frequency Counters [740-10]

Manufacturer Table	Optoelectronics, Inc. CUB	Optoelectronics, Inc. M1	Optoelectronics, Inc. CD100	BK Precision 1875
Product Narrative	Frequency counter (1MHz to 2.8GHz). Eight selectable gate times. Time base accuracy 1 ppm.Sensitivity 5mV to 200mV. Antenna purchased seperately.	Microprocessor based counter. with digital filter, auto capture and computer I-face. 10 gate times. Sensitivity 1mV to 20mV. Backlight. Antenna optional.	The Multicounter combines a frequency counter and tone decoder in one handheld package. Quickly check frequency and tone, verify radio operation. Two line by 16 character backlit LCD display. Internal frequency/tone memory can be downloaded to PC with optional Optolinx interface. 100Hz resolution. Reads CTCSS, DCS, LTR, and DTMF. With optional hardware and software it can reaction-tune Icom R10, R7000, R7100, R8500, R9000, AOR AR8000, AR8200, and Optoelectronics Optocom, R11, OS456, OS456Lite, and OS535 receivers.	Hand-held portable counter for field use. High sensitivity for VHF and UHF frequencies, wide range measurements up to 2.5 GHz, wit Data hold, relative, and memory functions (Max, Min, and Average readings)e

Agilent DC to 12.4GHz Frequency Counters

High-performance, counters simplify systems and bench frequency measurements. Fast, Versatile universal counters, the Agilent 53131A/32A perform a wide variety of time and frequency measurements at speeds up to 200 measurements per second via GPIB. Automated limit tests and extensive analysis features help to locate detailed answers quickly. The technology of modulation domain analyzers allows the counters to gather more data for each measurement, offering higher resolution measurements in a fraction of the time it takes other counters. The value-priced 53181A counter is optimized for RF applications, measures frequency, period and peak voltage.

- Standard Bandwidth: 225MHz, with optional 1.5, 3, 5, or 12.4 GHz
- Features: GPIB interface and Intuilink connectivity software allows easy access to data from your PC
- Automatic limit testing, math (scale and offset), statistics (minimum, maximum, mean, and standard deviation)
- Save and Recall up to 20 instrument setups
- Models 53131A/32A Measures: Frequency, ratio, time interval and average, period, rise/fall time, positive/negative pulse width, duty cycle, phase, totalize, peak voltage, and time interval delay
- Model 53181A Measures: Frequency, ratio (Opt. Channel 2), period, peak voltage
- Options: Medium or High-stability timebase, Rack Mount Kit, Hard Case (sku 73299), Accessory Pouch, and BenchLink Software
- Dimensions: 3.5" x 8.4" x 13.8" Weight 8 lbs.
- Power: 100 to 120VAC, 50, 60 or 400 Hz: 220 to 240, 50 to 60 Hz

Agilent CW Microwave Counters

Agilent's 53150 series provides a high performance microwave counters that are at home in the field, bench or ATE environments. Convenience, portability and outstanding performance in a rugged intergrated case with tilting handle that can tolerate the vibration and shock expected in field use. The backlit LCD display ensures visibility in all environments, from dark to full sunlight, at distances exceeding 15 feet. These counters offer powerful functionality measurements including: averaging, arbitrary as well as nulling offsets for both frequency and power, display of power in either dBm, milliwatts and microwatts.

- Frequency Counter: Ranges from 10 Hz to 20GHz, 26.5GHz and 46GHz
- Save and Recall up to 9 complete measurements
- Sample Rate: User-selectable, Fast 20 ms, Medium 250 ms, Slow 1 s and Hold
- Math Functions: Offset, Averaging, and Cable Loss Compensation
- Programming: HP-IB (IEEE-488.1) or RS-232
- Dimensions: 8.3" x 3.48" x 11.82" Weight: 10 lbs., 15lbs with Battery option
- Options: Oven Timebase (001), Battery with DC input (002), and Soft Case
- Includes: Programming and Service manuals and AC power cord.

Multimeters and Capacitance Meters

nufacturer ble	Meterman-Wavetek DM73B	Fluke 7-600	Meterman-Wavetek DM78A	Meterman-Wavetek DM2
igital ultimeters 540-10]				
duct Narrative	Fully autoranging w/ 4 programmed voltage & resistance scales. Features probe-hold and continuity tone for accuracy. Includes alligator clip and spare probe tip.	Economical meter automatically chooses AC, DC, or ohms when connected to ciruit under test. Yellow case. 600 Volts. Includes TL75 Hard Point Test Leads.	Fully autoranging w/ 5 voltage & 5 resistance scales. Also features diode& continuity tests.Carrying case & probes included.	Multimeter w/ 16 manual ranges. Can read DC/AC volts, DC current, and resistance. Features diode test.

Digital Multimeters [540-10]

Manufacturer Table	Meterman-Wavetek 27XT	Fluke 83 III	BK Precision 5370	Triplett Triplett 9040
Product Narrative	Multimeter w/ logictest,xsistor gain msrmnt.,capacitance& inductance meter,frequency counter, Continuity & diode test. LCR.	Meter w/ freq. counter, capcitance meter, diode & continuity tests. Backlit display w/43 segment bargraph. Touch hold, relative, max/min save.	Multimeter that features volts, ohms, current, frequency, capacitance, diode test, continuity, temperature, decibels, and RS232 interface.	Autoranging Multimeter with 38 ranges. Measures volts, amps, ohms, frequency, capacitance, co tinuity and tests diodes.
Type	Handheld	Handheld	Handheld	Handheld
Display	LCD digital	LCD digital	LCD digital	LCD digital
Resolution	3.5 digits	3.75 Digits	5 digits	3.75 digits
Counts	1999	4000	50000	4000
Bargraph	N/A	43segment, 25 ms update	Analog Bar Graph	41 Segment
Freq. Range	50Hz - 1kHz	.05 - 200kHz	.6Hz to 500 Khz	N/A
Auto-Ranging	N/A	N/A	Yes	Yes
Input Impedance			0-10 Mohm	
Voltmeter Scales (DC)	.2,2,20,200,1000 V	.4, 4, 40, 400, 1000 V	500mV, 5V, 50V, 500V, 750V, 1000V	400mv to 1000v
Voltmeter Accuracy (DC)	0.5%+/-1	0.1%+/-1	.05%	.3%
Voltmeter Scales (AC)	.2,2,20,200,750 V	.4, 4, 40, 400, 1000 V	500mV, 5V, 50V, 500V, 750V	4v to 750v
Voltmeter Accuracy (AC)	1.2%+/-3	0.5%+/-2	.30%	.5%
Ammeter Scales (DC)	.2,2,20,200mA,20A	.4, 4, 40, 400 mA, 10 A	500u, 5m, 50m, 500m, 10A	.4mA to 10A
Ammeter Accuracy (DC)	1.0%+/-1	0.4%+/-2	0.2%	.8%
Ammeter Scales (AC)	.2,2,20,200mA,20A	.4, 4, 40, 400 mA, 10 A		.4mA to 10A
Ammeter Accuracy (AC)	1.8%+/-4	1.2%+/-2	.60%	1.3%
Ohmeter Scales	200,2K,20K,200K, 2M,20M,2000M ohms	400, 4K, 40K, 400K, 4M, 40M ohms	500, 5k, 50k, 500k, 5M, 50M	400 ohm to 40 Mohm
Ohmeter Accuracy	1.0% +/- 4	0.4% +/- 1	.07%	.5%
Frequency Counter Scales		0.5 Hz to 200kHz	.6 hz to 500 Khz	200hz to 200Khz
Frequency Counter Accuracy			.03% rdg.+- 1 digi	.1%
Capacitor Scales	2,20nF, 2, 20, 2000 uF	1nF, 0.05uF, 0.5uF, 5uF	50n, 500n, 5u, 50u, 500u, 5000u, 50m	1 microF to 1 mF
Capacitor Accuracy	5.0% +/- 10	1.0% +/- 2	1.0%	2%
dB-meter Scales	N/A	N/A	Selectable from 1 - 9999 ohms	N/A
dB-meter Accuracy	N/A	N/A	.09 x VAC accuracy	N/A
Tests - Continuity	Audible tone	Audible tone	Audible tone	Yes
Tests - Diode	Yes,(3.0V-1.0mA)	Yes,(3V, 0.8mA)	Yes 2V, 1mA	Yes
Tests - Logic	TTL/CMOS,20MHz	N/A	N/A	
Transistor Gain Accuracy	0-1000	N/A	N/A	N/A

Digital Multimeters [540-10]

Manufacturer Table	BK Precision 390	Fluke 867BE	Triplett Triplett 2105	Meterman-Wavetek 35XL
Product Narrative	Multimeter that features volts, ohms, current, frequency, capacitance, diode and continuity test, temperature probe, memory, and auto ranging.	Graphical multimeter combines the industry's most advanced multimeter functions with the visual power of graphical analysis.	The Model 2105 includes AC Wattage Adapter which can be used to monitor the wattage on a wide variety of devices. When in the "Wattage Range" the 2105 will simultaneously display Wattage, AC Voltage, AC Current and Power Factor.	
Type Display Resolution Counts Bargraph	Handheld LCD digital 3.75 Digits 4000 Analog Bar Graph	Handheld Backlit LCD 5 Digit 32000 count Multiple ranges	Handheld LCD digital 3.75 3999 42 segment	Handheld LCD Digital 3.5 Digits 3200 analog

Capacitance and LCR Meters [540-15]

Manufacturer Table	BK Precision 810C Capacitance Meter	Meterman-Wavetek CR50	Meterman-Wavetek LCR55	BK Precision LCR/ESR Synthesized In-Circuit Met
Product Narrative	Model 810C compact capacitance meter, designed for accurate measurement. It features pluf-in test sockets and test lead jacks. Zero adjust knob to zero out test lead capacitance.	Capacitance meter with 9 different scales ranging from 200pF to 20000uF. Highest resolution is 0.1pF on the 200pF range. Can measure resistance on 7 scales: 20 to 20M.Other features incl diode test, continuity, and low ohms. Zero out stray capacitance.	Inductance, capacitance, and resistance meter with 28 user ranges. Also tests diodes, including microwave diodes, and has slots for capacitor plug-in and dedicated test socket for transistor testing. Zero out low resistance in leads.	Synthesized In-Circuit LCR/ESR meter: Includes SMD Probe (surface mount tweezers), rechargeabl batteries, and AC adapter with RS 232. Additional measuremets: (Z,L,DCR,ESR,D,Q and Q phase) Frequency 10KHz, DCR 9999Mohms, ESR 9999ohms, Q Phase -180 to +180.

Capacitance Probes, Glass Testers [540-18]

Cellular Glass Tester

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
5716 EACH	Radiall/Larsen GT COUPLER 90 days	On-Glass tester. Use with capacitance meter to test if the glassis suitable for using a glass mounted antenna.	50.00 0.06 0.03	29.50 28.50 27.50

Temperature Meters and Accessories [540-20]

Fluke Thermocouple

53593

Fluke thermocouple module for measuring temp on DMM's having a 10 Meg-ohm input impedance and 3mVDC scale. Provided with 80PK-1 type-K bead probe. Switch selectable Farenheit or Centigrade scales. Temperature range: -50C to 1000C or -58F to 1832F. Bead probe included.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Data Logging Equipment [540-24]

Data Loggers

The Clamp-on Simple Logger is a self-contained data logging AC current probe. It requires NO USER SET UP and automatically adjusts its scale and sample rate to optimize the recording. One button operation. True RMS measurements with 0 - 600 Arms input. Storage of over 8,000 data points with a built in RS-232 port for down loading data. One year operation off a single 9V Alkaline battery. An included Windows based software package allows plotting, statistical analysis, text annotation and zoom capability.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
29476 1 EACH	AEMC Instruments CL600 1 yr	True RMS AC, clamp type, current probe logger Includes software, 6 ft. DB-9 RS-232 cable, 9V Alkaline battery and manual..	389.00 3 1.36	387.06 385.11 381.22

Data Loggers

The Simple Logger family of loggers requires NO user set-up and automatically adjusts its scale and sample rate to optimize the recording. One button operation makes these data loggers extremely easy and quick to use. A Windows-based software package is included which allows plotting, statistical analysis, text annotation and zoom capability. The Simple Logger family of products is directly compatible with the complete line of AEMC/Æ Instruments current probes and those from other suppliers. Models are available for recording V-rms, A-rms & Temperature. Can run for up to a year on one 9V Alkaline battery.

High Current DC Power Supplies

The 1790/1791 high current power supply is ideal for telecom applications offering a low noise output, so that power does not interfere with testing of telecom devices. For telecom industry that operates from 48Vdc or higher: base stations, switches, public and pr vate telecom network equipment, PBX systems and D to DC power supplies that power equipment.

- Continious High Current operation Low Noise
- Voltage output 32Vdc regulation 0.01% +/- 2mV
- Current output 20A regulation 0.05% +/-10mA
- Ripple Noise 6mA rms max.
- Power: 120/230V, 60Hz consumption 1725W
- Dimensions: 19" W x 5.25" H x 15.75" D
- Weight: 62 lbs.

gilent Basic DC Power Supplies

Affordable, full-featured benchtop power supplies provide excellent performance and flexibility. The E3600 series offers clean power with dependable regulation and fast transit response.

- rescision Linear DC Power Supplies
- ingle, dual or triple outputs
- 0-Turn voltage and current controls
- igital voltage and current meters
- lodels: E3611 & E3612 offer dual range, Constant Voltage and Constant Current modes
- Models: E3616A &E3617A offer adjustable overload protection, voltage and resistance programming, remote sense, rear outputs, and CV & CC modes
- Models: E3620A Isolated Dual outputs & E3630A Triple output with 10-turn pots and CV and CL modes
- Power: 115 VAC, 47-63 Hz (Std.): Optional 230 VAC 47-63 Hz
- Dimensions: Models E3611/12/20/30A 3.6" x 8.4" x 12.6", Models: E3616/17A 3.6" x 8.4" x 14.7"
- Output Connections: Standard Banana Plugs, or hard-wired

gilent Programmable DC Power Supplies

Agilent programmable DC power supplies offer performance of system power supplies without the high price. Their low noise and excellent regulation are essential for R&D, general purpose bench testing, production, Sub-assembly tests, Bias Power for circuits and QA verification. All models offer clean power, dependable regulation and fast transient response with built-in GPIB and RS-232 interfaces.

- atures: Single and Dual Output Models
- W, 50W, 80W, 120W and 200W output power
- w noise and excellent regulation
- Over-voltage and Over-current protection
- Built-in GPIB and RS-232 interfaces
- Dimensions: (E3641A/43A/45A) 10" x 4.1" x 14.7", (E3649A) 8.9" x 5.2" x 14.7"

Tektronix Programmable DC Power Supplies

The power supplies can be operated in one of three modes: independent, series or parallel. In the two tracking modes, the variable outputs are connected either in series or parallel, the controls of the master supply adjust the voltage or current of both. Each power supply features 100 memories to store voltage and current limits for instant recall via front panel or GPIB interface.

- Triple Output Programmable power supply
- Dual 4-Digit LED Display Output, SCPI compatible
- Internal memory 100 readings, GPIB (SCPI), and Overload protection
- Power: 110/220Vac, 50/60 Hz

3M™ Products... *Providing Protection, Quality, Reliability & Durability* in maintaining wireless systems.

Electrical Connecting:
- Spring Connectors
- Terminals
- Insulation Displacement Connectors

Electrical Insulating & Sealing:
- Vinyl and Rubber Tapes
- Electrical Coatings
- Heat Shrink Tubing
- Waterproof Mastics

Wire Marking Products

Fastening Products:
- Cable Ties
- Hook & Loop
- Dual Lock
- Foam Tapes

Static Protection:
- Static Bags
- Monitors
- Wrist Straps
- Work Stations

TESSCO is a 3M Authorized Electrical Distributor.

Dewalt Cordless Screwdriver

430048

- Industry's most powerful screwdriver with a maximum torque output measure of 80 in/lbs
- Variable speed trigger switch provides 0-500 RPM for fastening and pre-drilling into wood, plastic and light guage metal
- 'Quick Release' metal chuck that allows for quick screwdriver bit change and prevents bit run out
- Professional grade switch with overload protection
- 16 position adjustable clutch provides a wider range of torque settings
- Electric brake provides a greater amount of operator control

Hammer Drill Bits

434179 473185

These Carbide-Tip Bits are specially made with hex shanks for use with Hammer-Drills. Hex shanks can be gripped more firmly than round shank bits, therfore reducing the likelihood of slipping. Use these bits for drilling primarily softer materials such as masonry, brick, block, softer aggregate concrete, etc.

Field Service Tool Kit

Our Field Engineer Service Kit represents many exciting firsts in our long history of supplying tool kits. Not only is it our best ef-fort yet packed with everything today's engineer might need, it surpasses all competition. In designing this ultimate field service kit, we put our customers requests first by creating the most versatile complement we've ever offered for use across multiple industries. We've compiled the most popular and best quality tools from our vast product offering. We've carefully selected every item down to the finest details to in-clude the most popular large circular extendable mirror and a Rayo-vacÆ industrial flashlight rather than the usual disposable one. Each tool (even those in sets) is secured in its own individual pocket on two remov-able pallets. Extra storage space is provided under the bottom pallet.

Fiber Optic Installer Kit

Your fiber optic tool kit features the latest connector technology to meet you network installer's or technician's installation and field termination needs. Whether your using ST, SC or ST/SC. Perform mechanical splices for LAN-type terminations. Make high-performance connections in less than two minutes without the mess, expense and curing time of epoxy. Low-cost mechanical installations as strong as epoxy because they're supported on four points: fiber, buffer, strength member (Kevlar fiber layer) and jacket. Durable black protector case is designed to withstand extreme temperatures and hazardous conditions. Made of lightweight, space-age structural foam resin with extra thick walls, it's watertight, airtight, corrosion proof, and dustproof. Includes neoprene watertight seal, atmospheric pressure valve, multiple security latches and ergonomic handle. Tools fit snugly in die cut foam base. Lid is filled with protective convoluted foam. Kit measures 18"W x 12.875"H x 6.75"T from the inside. USA.

- 3 Fiber Optic Strippers

ASIAX Cable Prep Tools

EASIAX precision cutting tool is the only cuting tool made exclusively for HELIAX coaxial cable. Cuts precisely at crest of cooper corrugation at the exact distance required for easy connector attachment. Clean cut makes flaring easier. Preecise blade depth makes it impossible to cut inner conductor. Consistent cuts every time.

Prep Tool for Ground Kit Attachment

Cable preparation tool makes installation of ground kits fast and easy. Just open the tool, attach around the cable and spin. The internal cutting edge slices away the jacket to expose the outer conductor.

Andrew Cable Recondition/Seperation Tool

Andrew Recondition and Foam Separation Tools for 7/8" through 1-5/8" Coaxial Cables will take a (2) step task into (1) step task by reconditioning the cut edge of the outer conductor to it's original shape and dimension. Seperates the foam from the outer conductor. This Operation forms the cable end for precise entry into standard, Ringflare, and Onepiece connectors and ensures proper connector attachment.

High tension Hack Saw

73806

Rugged, lightweight frame built for professional tool users. Use Nicholson Bi-Metaloy and achieve a remarkable improvement in cut-off performance- no blade twist, reduced binding, square cuts, better finish. Cuts faster through the toughest materials,& blades last longer. The secret is a screw operated lever with folding handle up to 30,000 psi (ordinary frames may give you up to 15,000 psi maximum). The higher the tension reading, the greater the blade beam strength and cutting results.

Pivot Head Ratcheting Combo Wrenchs

The box end ring gear has 72 extra fine teeth, allowing the ratchet mechanism to engage with just a 5 degree movement of the wrench compared 30 degrees with standard wrenches. The Pivot head swivels 180 degrees for ultimate versatility. This allows the box end of the wrench to access work a standard flat wrench would not be able to reach.

- Pivot head swivels 180 degrees for ultimate versatility
- Works at angles other flat wrenches will not handle
- Patented ratchet feature turns bolts with just 5 degrees of handle swing
- Mirror finish chrome vanadium steel for maximum strength
- Ratcheting closed end uses 12 points of contact for less stress to the fastener

Super-Tru Tip - Phillips type

79763 62775 66549 91529

The bright, nickel chrome plated blades have tips which have been specially treated & finished with black oxide for the ultimate in control. The advantage lies in the closer fit of the super-tru tips for much longer life and the reduction of damage to screw head recesses, especially in the smaller size fasteners.

Interchangeable Blade Tools [580-67]

If you are buying these, you may need:

Cordless Drills . . . . . page 1514
Tool Cases without Tools . . . . . page 1531

99 Series Handles

50583 54584

The Series 99 interchangeable blades, shanks, & handles shown on the following pages are all available separately, allowing gradual, economical accumulation of whatever items might be needed for your individual requirements. This also permits ownersof series 99 sets or kits to enlarge them or substitute tools, as necessary atminimal cost.

99 Series Ratcheting Handles

92977 98697

The easy to operate Regular (99-1-RV) or Tee (99-4-R) reversible Ratcheting Handle permits extremely simple one handed operation, even in tight quarters. New features include silent operation, a smooth precise action and left- right-neutral marking indicator. Light ratchetingdrag facilitates turning and prevents fastners from reversing.

UTICA Adustable Torque Screwdrivers

- Standard product calibrated right hand only. Left hand
- Choice of adjustable models with precision micrometer
- U.S. Standard or metric scales
- Precision micrometer scale (adjustable models)
- Easy-release bit holders securely retain bits during
- Anti-backlash design for repeatability.
- Meets or exceeds ASME B107.14M and
- Adjustable model accuracy is ±6% of setting, starting
- Preset models accuracy ±4% right hand only.

NDSTROM Torque Field Service Kit

A tailor made service case for mobile users within the electronics field. Ideal for field service work, the TSK505 contains a comprehensive selection of bits in a practical box for use with Lindstrom's Torque Screwdrivers. Within the case, a compartment provides space for one of the 7 Lindstrom Torque Screwdrivers (see above). This makes it flexibel for the user to design the kit for his unique needs. Torque Screwdriver must be ordered separately.

Wire Wrap Tools [580-79]

JONARD Wire Wrap Guns

437365 466361 472349

Manual quick wrap guns ergonomically improved. Hand operated wrapping guns use interchangeable bits and sleeves. Tools can provide up to 10 revolutions per squeeze of the trigger and accamodate wire sizes from 22-32 AWG. The plastic gun offers the advantage of light weight, and the metal gun provides greater durability. The insulated metal gun has the added feature of 1000 volt dielectric strength protection. All three guns are used for production line and in field service use in the electronics and telecommunications industries.

O.K. Manual Wrapping Tool

41344 79737 42665

The G100/R3278 and G200/R3278 tools are designed with a chuck nose piece to make use of the full line of bits and sleeves made for power tools. These tools accomadate wire sizes from 22AWG (0.65mm) thru 32AWG (0.20mm). These tools can provide a maximum of ten turns. Fewer wraps can be achieved by adjusting the "strip" length of the wire. BITS & SLEEVES SHOULD BE ORDERED SEPARATELY.

ortable Wrapping Tool

41171

COOPER TOOOL Wire Wrap Gun for telephone installers, electronic technicians, & servicemen. Squeeze the handle & a quality solderless wrap is made. One squeeze provides ten revolutions of the wrapping bit. Features strong, lightweight, plastic housing. This sturdy tool will withstand rough handling and require only a minimum maintenance over a long service life. ROTATION CLOCKWISE (right-hand). PRIMARY APPLICATION IS FOR WRAPPING. Can be used as an unwrapping tool for terminals that are unconventionally (left-hand/counter-clockwise)wrapped. Best suited for wire sizes 22-32 AWG (diameter 0.253" - 0.0079").

ttery Powered Wrap/Unwrap Tool

9382

Cordless automatic wrapping & unwrapping tool. Features: (A) Self-Aligning Gearing System: A new drive train design that will reduce part breakage & repair bills. (B) Operator Adjustable Indexing: A simple adjustment of the outer knurled ring places the indexing position of the bit to suit individual preference. Both rechargeable and non-rechargeable batteries may be used. A built-in safety feature prevents the accidental recharging of non-rechargeable batteries. The R3 can make over 1100 connections with one charge. 3000RPM, 120V. For wire sizes 22-32 AWG.

JONARD Diamond File Kit

491316

These diamond contact burnishing spatulas consist of uniform abrasive diamond particles, set in a special metal for precise effective cleaning, polishing, and burnishing with minimum pressure, so very little metal is removed. They apply strong abrasive power, are long lasting and the natural iffegular shapes of the diamond particles prevents clogging. It is also used effectively in removing burs and rough edges of sub-miniature IC's. The contact face will always remain perfectly polished due to the uniformity of the diamond particles. Flexible dielectric plastic handle permits accessibility to awkward areas and can be used without power shut off. Three types of diamond contact burnishing spatulas for every application are included in this kit.

GPS and Navigation Aids [227-30]

Garmin eTrex Receivers

10010 418063 433111 442135

The Garmin eTrex takes the best features of a 12 parallel channel GPS and put them into a 6oz. package that is only 4.4 " high and 2" wide. All buttons are located on either side of the unit, allowing one-handed operation that won't obstruct the 2.1" H x 1.1" W high-contrast display. The eTrex is completely waterproof. It will run up to 22 hours on two AA batteries (not incl.). eTrex will store up to 500 waypoints with graphic icons and has the exclusive Trac-back feature that will reverse your track log.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

EXOFIT Tower Climbing Harnesses

66147

EXOFIT harness is the first of a new generation of harness constructed of high performance material used in mountaineering, scuba & sky diving and the military.

Uses a breathable lining that immediately draws moisture away from the body.
Built-in shoulder, hip and leg padding that always stays in place.
Lycra edging moves with the climber, preventing rubbing and chafing.
One-handed quick connect buckles make putting on, adjusting and removing the harness a snap and provides a memory fit.

- Wrap around no-tangle design slips on like a vest., making it quicker and easier to put on.
- Back ring for fall protection, front rings for ladder climbing/positioning and side D-rings for work positioning.
- Adjustable non-slip chest strap with quick connect buckle
- Built-in belt loops to support tool belt

DBI/SALA Steel Cable Self Retracting Lifelines retract into the block as the worker moves toward the unit and pulls out as the worker moves away. The sudden jerk of a fall activates the bracking mechanism and the worker is brought to a stop. Includes safety features such as a swiveling anchorage loop to prevent twisting of lifeline, a reserve lifeline retention system and self locking swivel snap hook with impact indicator. Polyurethane housing and 3/16" galvanized steel wire rope for drability. Meets or exceeds all OSHA and ANSI applicable regulations.

Stratos Safety Cable System

91075

Trylon Stratos safety cable system provides effective fall protection. Precision made using the finest stainless steel.

- THE TROLLEY
- supplied with an auto-locking Karabiner
- features double locking mechanismfor even greater safety
- easily installed
- THE CABLE
- factory-installed termination at top end
- 3/8" 7x19 galvanized wire
- high-capacity breaking strength
- THE SYSTEM
- mounting brackets are designed to absorb shock impact
- multiple trolleys can be used
- urethane cable guides eliminate RF noise from cable
- meets or exceeds industry requirements

Stratos Universal Stand-Off Mounts

460136

Now there is a solution for adding fall protection to a tower without a climbing ladder. Trylon's universal cable support mount will attach to either a round or angled tower leg to give you the ability to conform to OSHA requirements concerning fall protection. One model covers from 1 1/2" to 10 3/4" OD round members and from 3" to 8" angled members. A 3/8" Stratos safety cable system must be purchased separately. Stand off mounts are available to keep the 3/8" cable secured as it goes up the tower. These can be ordered separately.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description Size	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

EME Alarms [617-10]

RF Personal Alarm

3159 440312

All RadMan monitors are multi-function tools. With the RF absorber cap off, the RadMan functions as a simple instrument with isotropic detection and 4 level indicator LED's that provide an approximate indication of field strength. All models can also be used as a simple area monitor. The ESM-TS Interface Set (Sold separately) allows the user to download the data collected by the XT Series monitors to a PC.

- MHz to 40 GHz
- haped Frequency Response matched to your standard
- imultaneous E and H Field Measurement
- LED level indicators
- Data Logger records continuously (RADMAN XT Models)
- Isotropic Response when used off the body
- Optical Interface can be used "Real Time"
- Multi-function: Can be used as a Personal Monitor for leak detection and simple measurements
- Patented Design

ntinuing product table (1 of 2)

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
36052 EACH	NARDA Microwave Corp. BN 2251/02 2 Years	RadMan XT RF Personal Alarm. E field sensor is rated 3 MHz to 40 GHz, H field sensor is rated 3 MHz to 1 GHz. Operating over the maximum frequency range and generally shaped to match the higher level of 2 tier standards. The data logger can log over 1600 sets of data and be reviewed whenever there is a need, similar to a Aircraft Flight Data Recorder.	1,550.00 1.05 0.48	1,550.00 1,550.00 1,550.00
78159 EACH	NARDA Microwave Corp. BN 2250/52 2 Years	RadMan RF Personal Alarm. E field sensor is rated 3 MHz to 40 GHz, H field sensor is rated 3 MHz to 1 GHz. This series is identical to the full featured RadMan XT except that these monitors do not include the data logging capability.	1,450.00 1 0.45	1,450.00 1,450.00 1,450.00
11047 EACH	NARDA Microwave Corp. BN 2251/72 2 Years	RadMan XT ELF Immune RF Personal Alarm. E field sensor is rated 27 MHz to 40 GHz, H field sensor is rated 3 MHz to 1 GHz. Very similar to the RadMan XT Series (Including data logger) except that the inside of the housing has a special conductive coating that blocks the ELF signals. The frequency range is reduced at the low end due to the coating.	1,650.00 5 2.27	1,650.00 1,650.00 1,650.00

EME Signs [617-40]

Electromagnetic Energy (EME) Signs

30661

NOTICE Sign with information critical to the potential for exposure to RF fields and may be used as part of an overall RF safety program at your facility to comply with new FCC rules on RF fields and employee & public awareness. Signs are 12" wide by 18" tall, aluminum with rounded corners and holes near each corner for mounting. A special UV resistant coating is applied for longevity in outdoor environments.

Streamlight Spetor

496306

The combination of brilliant LEDs in this headlamp places the new Septor in a class by itself. Its piercing light comes from seven super bright white LEDs each with a life of 100,000 hours so you will never have to replace a bulb again. The LEDs provide 3-way, hands free lighting for short, medium, and long distances. Plus, a 90 degree tilting head lets you zero in on the source you're illuminating. Constructed of virtually indestructible polymer, the new Septor has a fully adjustable straps for the ultimate in hands-free LED lighting.

ESD-Safe Smoke Absorber

47906

Designed to remove solder flux fumes and other workplace fumes from the operator's breathing zone. Harmful fumes are drawn through an activated carbon impregnated foam filter. The air is filtered, cleaned and returned to the workplace. Features high air flow fan (35CFM), three height adjustments, three pre-drilled holes for mounting and static safe housing. It measures 8.7"W x 10.6"H x 6.6"D, operates on 115 VAC, 50/60 Hz, 17 Watts and comes complete with three filters.

Metcal BVX-100 Bench Fume Extraction

460197

This unit meets the needs of both single users and today's fast-paced, flexible manufacturing. Compare this system to larger, multi-user machines and you will find the BVX-100 System requires no installation, offers flexible operation, has a small, space-saving footprint, and matches the air flow of large multi-user systems. The BVX-100 system features quiet operation and a bi-colored LED light to indicate blocked filters. Set the 12" wide plenum on the bench and turn it on for instant fume extraction. Harmful and irritating fumes, particles and vapors are immediately removed from your operator's breathing area. If you need the flexibility to move the collection device to the sorce of the fumes, and innovative adapter transforms the plenum into an arm extraction system.

MASTER Econolron Model EI-20K

The MASTER Econotron is a basic, butane-powered heat tool kit that includes a: butane-powered soldering heat tool, solder tip, heat tip, torch tip, hot knife, solder and sponge.

444374

- It contains unit, solder tip, heat tip, torch tip, hot knife tip, coil of 60/40 solder, sponge and tool rest packed in rugged plastic case
- Completely portable, lightweight and easy to handle
- Economically priced
- Temperatures up to 2370∞F/1300∞C
- Started with flint lighter built in the cap
- Use to pinpoint heat, silver solder, solder and desolder, shrink heat shrink tubing, strip insulation with hot knife, torch material and more

MASTER Ultratorch Model UT-100Si

MASTER Ultratorch UT-100Si is a self-igniting, butane-powered soldering iron/heat tool w/built-in fuel filter for consistent ignition and adjustable temp to 1200∞F.

413360 483320

- Professional quality, self-igniting, butane-powered soldering/heat tool
- Built-in fuel filter for consistent fuel ignition
- Adjustable temperature up to 1200∞F
- Built-in window indicates fuel level
- Dual function soldering iron and heat tool
- Use to pinpoint heat, remove surface mount components, repair vinyl, shrink heat shrink tubing, solder and desolder, spot dry, and more
- Optional accessories available and interchangeable between UT-100 and UT-100Si

Weller WHA-300 Hot Air Station

The Weller WHA-300 combines the power and features of moreexpensive hot air stations in a compact package. It features a full 700 watts of heating power. The temperturerange is 125 degrees to 1022 degree. Air flow is is adjustable from 10 liters/minto 50 liters/min. Compact size uses less space on the bench. Weller offers a full range of nozzles in vavious shapes and sizes. Uses 58736 series nozzles.

Metcal MX-500S-11 Soldering Station

The soldering handpiece allows you to solder and rework SMT components with the appropriate tip cartridge. Features automatic time-out: when the cartridge has not been used in the last 30 minutes the system will automatically shut off. This will maximize the life of your tip cartridge. System comes complete with two port switchable power supply, soldering handpiece, workstands, sponge and a cartridge removal pad. TIP CARTRIDGES SOLD SEPARATELY. Soldering handpiece accepts all soldering and SMT rework tip cartridges.

Pro Wick Solder Removal Braid

10009

Pro Wick braid design has strong capillary action that works instantly to pull in excess solder. The large surface area created by the one-over, one-under construction enhances absorption and trapping of molten solder. 100% copper wick is coated with flux, which cleans connections thoroughly during desoldering to insure maximum solderability. Techspray vacuum seals its Pro Wick in durable clear plastic to protect it from moisture and to prolong shelf life of the product. ESD BOBBIN

Soder Wick Solder Removal Braid

16612

Soder-Wick significantly reduces rework/repair time and minimizes the risk of heat damage to the board. It's geometrically precise weave design allows for maximum capillary action and solder capacity. Minimal flux residue on the board speeds up the cleaning process, or eliminates it entirely. Soder-Wick Desoldering Braid is available in a variety of widths, lengths and flux types. Application-specific sizes allow for precision solder removal in a flash. Sealed in Performance Pak Barrier Packaging and VacuPak Vacuum Sealed Packaging, Soder-Wick Desoldering Braid is completely protected from the harmful effects of the environment.

WELLER NT Soldering Tips for WMP Iron

NT-Series Tips are designed exclusively for the WMP Micro Soldering Pencil. This unique tip has the heating element contained in the pencil rather than the tip so that you don't throw away a good heater everytime you wear out a tip. This gives you substantial cost savings over the life of the soldering station

Contact Cleaner

A nonflammable, fast-drying contact cleaner that is safe on plastics. Also does not conduct electricity so it can be sprayed on energized ("hot") electrical circuits. Mil-spec approved. No aroma.

- Will not harm most plastics, rubber belts or LEDs
- Non-Flammable and Non-Conductive. Can be used while a circuit is hot
- Contains HCFC-141b
- Due to potential global warming effects, Select this product only when no other product meets the performance/safety requirements

Liquid Flux

148

Organic, water soluble flux for a wide range of general purpose applications. Delivers faster than rosin fluxing action for high speed soldering. Can be used in electronic applications provided that water cleaning is used to remove all flux residue. Circuit boards must be designed for organic fluxes and water cleaning. Residue is corrosive if not cleaned with a water system.

Defluxer

090 59191

This cleaner delivers surprisingly strong cleaning despite its humble ingredients. A blend of three ultra-pure water-free alcohols, it is the strongest of the alcohol-based choices. It is safer than rubbing alcohol and an excellent choice on R,RA,SA,RMA,OA fluxes and "no cleans." It has a pleasant, mildly sweet aroma with excellent toxicity ratings. Medium drying, static-safe, Mil-spec approved, biodegradable, ozone-safe and plastic safe.

"PENETROX" Joint Compound

"PENETROX" oxide-inhibiting compounds produce low initial contact resistance, seal out air and moisture, and prevent oxidation or corrosion. All compounds contain homogeneously suspended metal particles that assist in penetrating thin oxide films, act as "electrical bridges" and improve electrical conductivity.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description, Size, footnoted	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Paints [610-70]

Tower Paint

Water Based TowerPaint for use on Untreated galvanized surfaces. Covers 200-400square feet per gallon at 1-2 mils thickness. Vinyl/acrylic emulsion resin provides long term protection and performance. Offers resistance to weather, ease of application with a paint mitt, and freedom from fire hazard. Meets FAA regulations for color coding.

RTV Sealant [610-75]

If you are buying these, you might need:

Connectors for Transmission Line . . . . . page 403

Silicone Grease Compound

68424

Soft, inert silicone grease with excellent dielectric properties. Usable over a wide range of temperatures. It's consistency is vaseline-like and it is white opaque in color. It provides an excellent dielectric coating which excludes moisture and prevents high voltage arching. Makes an excellent lubricant for rubber or plastic.

Horn Relays [180-63]

Bosch Relays

66032 95436 79246 53273

BOSCH Horn Relays come in many types, and are used in quite a few different vehicles. Most aftermarket relays will have a mounting tab for mounting it with a screw. Always mount them with the terminals facing down, as they will get water inside and fail.

Flasher Control

50993

BUSSMAN Flasher Control: Thermal design uses heat build-up to flash circuit on and off. Features an audible click, alerting driver that a directional signal is engaged. Generally used in older model year vehicles. Operates correctly under variable load ø flashing the designated vehicle lamps only; or additional lamps when a trailer is in tow. Does not indicate lamp outage.

Engine Noise Filters

67294

Specialized affected equipment noise filters eliminate interference in sensitive radios, stereos and video displays caused by alternators, motors or other electrical equipment. Can be used singly or in combination to attenuate conducted line noise. Installs on input power leads.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
67294 1 EACH	NewMar PC-10 2 years	Affected equipment filter. 10 amps @ 6-48 VDC.	59.95 1 0.45	39.57 38.97 38.07
22940 1 EACH	NewMar PC-25 2 years	Affected equipment filter, 25 Amps @ 6-48 VDC	92.00 1.1 0.5	60.72 59.80 58.42

Engine Noise Filters

69792

Specialized alternator noise filters eliminate interference in sensitive radios and data transceivers caused by alternators, motors or other electrical equipment. Can be used singly or in combination to attenuate conducted line noise. Installs on alternator output lead.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
69792 1 EACH	NewMar 80-A 2 years	Alternator filter. 6-48 VDC @ 80 amps	95.00 2 0.91	62.70 61.75 60.33

Engine Noise Filters

75999

75074

SPECO 10 amp extra heavy duty hot line filter for alternator and ignition noise noise. Capacitor and mounting hardware included.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
75999 1 EACH	CSI/Speco HLF10 2 Years	Heavy duty hot line filter to reduce alternator and ignition noise. 10 amp.	8.25 0.79 0.36	5.78 5.63 5.48
64358 1 EACH	Antenex NS1535 30 days	Reduces audio and radio frequency intereference. Low Pass filter design also protects against ignition transients. 15 amps @ 1-35 VDC.	28.00 0.25 0.11	16.13 13.42 12.55
75074 1 EACH	Antenex NS3035 30 days	Reduces audio and radio frequency intereference. Low Pass filter design also protects against ignition transients. 30 amps @ 1-35 VDC.	40.00 1.04 0.47	23.04 19.16 17.92

Ground Loop Isolator

35281

A small low level noise decoupler which breaks signal path ground loops using 1:1 isolation transformers. Decouples any DC offset voltage. Perfect solution to eliminate alternator whine.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
35281 1 EACH	Wireless Solutions N344 60 days	Ground loop isolator/noise suppressor	13.00 0.64 0.29	9.23 9.10 8.97
